

## Wheat Domestic Fundamentals:

- Wheat trades almost flat in Uttar Pradesh and Delhi. ITC is active in Bulandshahar and would continue to buy till the end of the month as per feedback received from local traders. Wheat in local market is available at Rs 1400/1405 per qtl. and is being loaded for Delhi at Rs 1550 per qtl. Traders says that prices are likely to stay steady to slightly firm from current level. Farmers in Uttar Pradesh still have ample stock and it might be around 25 to 30 percent of the marketable surplus. This means flow from farmers end would continue and it would remain restrictive to wheat market fundamentals in the weeks ahead.
- Wheat prices in Cash wheat market like Indore, Kota Delhi and Khanna are reel under pressure and bearish trend may continue this week. Arrival from private holdings continues and it is sufficient to cater current demand of the market. South Indian Floor millers are sourcing wheat from Rajasthan, Uttar Pradesh and Madhya Pradesh at around Rs.1800-Rs.2000/quintal on deliver basis and same trend is likely to continue next week too. Farmers in U.P still have marketable surplus around 20-25%. Government would start releasing wheat for OMSS probably from 1st of August and it would work as a cap if any uptrend starts.
- Wheat stock in central pool warehouses was registered at 39.37 million T on 01 July compared to 41.58 million T on 1st June 2014. The highest accumulated stock is in Punjab (15.56 million T) followed by Madhya Pradesh (7.93 million tonne) and Haryana (7.55 million Tonne) as on 01.07.2014.
- Cash wheat market traded weak despite end of procurement season and lower arrivals in major markets. Supply side is ample as private players are releasing stock, meant for export, in domestic market. However, cash market may trade up as festive demand for wheat products would remain supportive in the weeks ahead. As market is ruling at lower level and has adjusted the impact of additional supply from private trade, more dip is unlikely from current level.
- ITC can start procuring wheat once again in Uttar Pradesh. Government would start releasing wheat for OMSS in August and price for OMSS may be revised slightly up (Rs 50 per qtl.) from last year. All these developments may encourage wheat price from the third week of July.
- Despite of slower start of procurement, wheat procurement by the end of June touched 27.9 Mn t as expected in April by Agriwatch. It is 10% higher from last year due to higher lifting from Punjab, Haryana and MP.

## International Market Update:

- Wheat harvesting is underway in major wheat growing belt of southern Nebraska in US. So far only 13 percent crop has been harvested. It is almost 50 percent lower than last year till date. Despite weather disturbances almost 50 percent crop has been rated good to excellent and 10 to 15 percent in bad shape. The rest is considered to be in fair shape.
- US wheat export may hamper with increasing freight cost in the months ahead. A rally in freight rates would be detrimental to the chances of U.S., Australian and Argentine wheat in Middle Eastern markets. Russian wheat would probably be the winner now. U.S. soft red winter wheat, on a free-on-board basis, was currently \$6 a ton cheaper than Russian and Ukrainian wheat and \$5 a ton cheaper than Western Europe origins. Black Sea Region crop started hitting the market and Russian FOB quotes are hovering in the range of \$245 to \$250 per tonne.
- The wheat market was mostly higher in pre-long weekend book-squaring and consolidation. Weekly export sales of 567,500 MT beat trade expectations of 300-450,000 MT thanks to Brazil taking 140,500 MT.

## Domestic market Outlook:

**Wheat cash market may stay steady to slightly firm.**
