

## Wheat Domestic Fundamentals:

- Cash wheat markets takes note of the govt's latest decision of releasing 10 million tonne wheat for bulk buyers from August to March 2015 through e-tendering process. Wheat prices in major markets dip by Rs 10 to Rs 20 per qtl. Supply side is now bound to increase as quantity approved is 1.5 million tonne higher than last year for the same period of time.
- Private and bulk buyers had brought 5.8 million tonne wheat in eight months, from August to March against allocation of 8.5 million tonne. This year higher quantity would continue to regulate price even in the lean season as old crop would be available around Rs 1500 per qtl. plus freight charges. New wheat would be given at 5 percent premium that means at Rs 1575 per qtl, lower than current prevailing prices.
- This decision would not allow private traders to drag price up for their own interests. Availability would be enough throughout the season. As quantity is higher, private trade would not be able to offtake more than 6.5 million tonne. However, there is a possibility of higher offtake, if international market gets firmer on Russian/Ukrainian/US issue.
- If wheat price in global market crosses over \$285 per Tonne, private trade may start taking new wheat through tender and think of exporting it. But such possibility is remote as prices in global market is ruling around \$230 to \$240 per tonne right now.
- Wheat cash markets in Uttar Pradesh get firmer on the back of improved demand from Rajasthan and Delhi. Demand from roller flour mills have improved during last one week. Festive season in India starts from 1st August and continues till November and during this period demands for wheat product increase considerably.

### International Market Update:

- Wheat harvesting in Kansas is heading towards final stage and would be over by the end of this month. According to national agriculture statistics service almost 95 percent wheat harvested from new crop is now in store. The quality is good and recent rains have not impacted quality of the grain. Harvesting reached near finishing line almost delayed by 15 days in comparison to last year.
- As per latest update by USDA global wheat production is bound to increase from June estimate of 701.62 million tonnes to 705.17 million tonne in 2014-15. Production in US would increase from 1.942 to 1.992 billion bushel. Pressure on global wheat market would likely to continue as corn prices are ruling lower \$3.835 bushel. Global corn production too is estimated at higher side and it would reduce demand for feed grade wheat. Recent firmness is due to short covering and investor's interest at current level.
- US wheat export may hamper with increasing freight cost in the months ahead. A rally in freight rates would be detrimental to the chances of U.S., Australian and Argentine wheat in Middle Eastern markets. Russian wheat would probably be the winner now. U.S. soft red winter wheat, on a free-on-board basis, was currently \$6 a ton cheaper than Russian and Ukrainian wheat and \$5 a ton cheaper than Western Europe origins. Black Sea Region crop started hitting the market and Russian FOB quotes are hovering in the range of \$245 to \$250 per tonne.

### Domestic market Outlook:

**Wheat cash market may stay steady to slightly firm.**
