

Wheat Domestic Fundamentals:

- **As projected earlier by Agriwatch the Government** has increased the minimum support price of wheat by a nominal Rs 50 to Rs 1,450 a quintal this year. The rabi crops of this year will be marketed in 2015-16 starting April.
- **A price of wheat in major mundis remains steady today.** In the coming future, prices are going to be in the range bound as there is plenty of stock in the market to fulfill the demand side. Export opportunity of Indian wheat to other countries is lower due FOB imparity. India Fob at Kandla port is around \$273-278/Tn as compare to Australia (\$264-267), U.S. (\$250-255) and Russia (\$230-235).
- **According to IBIS, export of wheat in the last week of October was around 32 Thousand Mt.** The major export destination of Indian wheat was Algeria from kandla port which accounted 31.50 thousand MT at an average FOB price of \$359.21/Tn .Other countries were U.A.E, Malaysia and Philippines.
- **Wheat sowing in Northern India is likely to delay by 15-20 days** from normal schedule due to late harvesting of paddy crop in Punjab and Haryana. Wheat sowing in Punjab and Haryana normally starts in the mid of October but this year it will start by the end of October.
- **FCI has invited bids fir 1Lakh Tn wheat selling through tender in Haryana region** at reserve price of Rs 1500/quintal just to augment supply in the open market especially for the flour millers in the month of October. It will restrict open market from firming up in the near term. More tender for wheat selling is likely in the third quarter as government has to sell almost 10MMt wheat in the rest of the current marketing year.
- **Wheat stock in central pool warehouses was registered at 32.26 million T** on 01 October compared to 35.17 million T on 1st September 2014. The highest accumulated stock is in Punjab (12.36 million T) followed by Madhya Pradesh (6.62 million tonne) and Haryana (5.89 million Tonne) as on 01.10.2014.

International Market Update:

- **Unfavorable weather in key wheat-growing regions in Australia** could cause output to fall more than 5 percent from the country's official estimate for 2014/15.Lower wheat production in Australia would support global prices, which have firmed in recent weeks due to concern over the condition of the U.S. winter crop, which is behind schedule after wet weather.
- **Bangladesh to buy 250000 of wheat at \$297.50 a tonne** c&f in a government-to-government deal with Ukraine. The Bangladesh state grains purchasing agency plans to import a total of 900,000 tonnes of wheat in the financial year that started in July.
- **Glencore, Vitol and Mesopotamia got the tender to supply 2, 00,000 tonnes of milling wheat to Turkey** grain board. They got the tender in the range of \$262-\$268 a tonne c&f and have to deliver shipment between Oct. 25 to Nov. 20.. The wheat is likely to be sourced from a range of origins including Russia, Ukraine, the European Union and United States.
- **Russia got the latest tender of GASC's of 55,000 Tonne wheat** of 12.5 percent protein content at \$239.30 a tonne on a free-on-board basis (FOB).The tender has given the necessary support to the declining wheat prices in Russia; however it may further move southward as export demand is reducing due to price competitiveness.
- **USDA has said in its latest release that global wheat production will touch** at 719.95 million tonne.It is .05 percent higher than August estimate. The reason of higher production estimate is mainly attributed to higher production in Ukraine and EU. Overall wheat stock will increase by 5.3 percent from last year.

Domestic market Outlook:

Wheat cash market is likely to trade steady to slightly weak.
