

Wheat Domestic Fundamentals:

- **Wheat area in Punjab is likely to reduce this year and may go under sugarcane** .Wheat sowing in Punjab has been started and 80% of the sowing has been completed in Sangrur district. According to the farmers of the sangrur district despite the fall in area, the production is likely to remain around 15.63 lakh tonnes in the next year, a little lower than the 15.67 lakh tonnes last year.
- **Wheat stock in central pool warehouses was registered at 30.13 million T on 01 November** compared to 32.26 million T on 01 October 2014. The highest accumulated stock is in Punjab (11.14 million T) followed by Madhya Pradesh (5.92 million tonne) and Haryana (5.25 million Tonne) as on 01.11.2014.
- **As of now Wheat area is lagging behind by 52% in comparison to last year** till date .As per latest update by agriculture ministry wheat coverage during 2014-15 has been registered at 4.47 lakh hactares against corresponding period of 2013-14(9.39 lakh hactares).
- **With favorable weather wheat sowing commenced in states like MP and Gujarat** last week and it is expected to begin in Punjab, Haryana and Rajasthan by the second week of November. Farmers in MP and Gujarat have covered almost 5 and 10 percent area so far.Wheat planting is almost delayed by a couple of week in Punjab Haryana and UP this year due to late harvesting of paddy .Despite late paddy harvesting area under wheat is unlike to decrease this year .
- **According to IBIS, Wheat exports from India slightly increased from 0.52 to 0.59 Lakh tonne in October.** Average Fob quote decreased from \$278.84 in September to \$276.86 per tonne in October. However, during the review period CBOT average quote increased from \$204.33 to \$222.94 per tonne. Export from India is bound to dip due to current disparity.US and Black Sea Region crops are cheaper and it would continue to hamper Indian export opportunity in the months ahead.
- **South Indian traders and flour miller had purchased 12,000 tonnes of premium white wheat from Australia** at \$310-315/tonne. They had purchased APW wheat which has a protein content of about 12 percent as the prices and transportation cost are lower than the domestic prices and logistics to reach wheat to south India.

International Market Update:

- **Morgan Stanley reduced its price forecasts for wheat** because global surpluses are larger than current expectation and said rates will probably fall to a level that may curb supplies in high-cost producers Australia. The bank cut its estimate for Wheat to \$5.40 a bushel from \$5.75. Wheat lost 15 percent as global production climbed to the highest ever, according to the U.S. Department of Agriculture. World grain reserves will touch a 15- year high and weigh on wheat prices, according to Abdolreza Abbassian, senior economist at the United Nations' Food & Agriculture Organization.
- **The U.S. Department of Agriculture on their latest report** cut its forecast for global wheat production with an increase in the EU crop more than offset by cuts for Australia, Kazakhstan and North Africa.
- **Argentina's wheat is first hit by frost and now by strong rainfall** which could cause an outbreak of disease in the crop. The crop is in an advanced stage of growth and these adverse conditions can effect in the final yield.
- **Egypt had purchased 60,000 tonnes of wheat from France at \$260/tonne CiF** which has to be delivered between 1-10 December. Till now from July 1st, Egypt has bought 1.955 million tonnes of wheat from the international market, in 2013-14 Egypt had purchased 5.46 million tonnes of wheat from abroad in addition to 3.7 million tonnes of local wheat.

Domestic market Outlook:

Wheat cash market is likely to trade steady to slightly weak.
