### International Market Update:

- **Chicago Board of Trade climbed from last week due** to adverse condition for wheat crop. This year winter season in US is colder than average winter and that could have an impact on yield of wheat crop. Market may test the first resistance level of 590 cent per bushel in the short term.
- **Morgan Stanley reduced its price forecasts for wheat** because global surpluses are larger than current expectation and said rates will probably fall to a level that may curb supplies in high-cost producers Australia. The bank cut its estimate for Wheat to \$5.40 a bushel from \$5.75. Wheat lost 15 percent as global production climbed to the highest ever, according to the U.S. Department of Agriculture. World grain reserves will touch a 15- year high and weigh on wheat prices, according to Abdolreza Abbassian, senior economist at the United Nations' Food & Agriculture Organization.
- **The U.S. Department of Agriculture on their latest report** cut its forecast for global wheat production with an increase in the EU crop more than offset by cuts for Australia, Kazakhstan and North Africa.
- **Argentina's wheat is first hit by frost and now by strong rainfall** which could cause an outbreak of disease in the crop. The crop is in an advanced stage of growth and these adverse conditions can effect in the final yield.
