

Wheat Domestic Fundamentals:

- **Early sown wheat crop in Punjab Haryana UP Rajasthan and Gujarat** is under tile ring stage and germination is set to be over of the sown seed. In some area farmers are thinking of second irrigation as crop has entered into sprouting stage. Crop in these states are rated good to excellent condition so far one pre monsoon rain is expected at this point of time which may prove more beneficial to the wheat crop.
- **Wheat sowing in various part of the country is on full swing** backed up by favorable weather .In khanna region of Punjab, wheat sowing reach at 70% of expected area .In Indore region of MP it is nearing complete ion of around 80%.however it is slower Bhopal where 50% area has been sown till date. In swarastra region of Gujarat sowing is over by 90% .Weather remains favorable and theses region sowing is likely to over by 1st week of December.
- **Despite ample supply from private and central pool wheat price is bound to move slightly up** in the coming weeks due to seasonal factors like lower supply of premium grade wheat, normal demand from whole sellers, retailers and flour millers. However any spike from current level is unlikely as supply from central pool stock through tender and it will remain restrictive to the market fundamental.
- **As of now Wheat area is lagging behind by 18%** in comparison to last year till date .As per latest update by agriculture ministry wheat coverage during 2014-15 has been registered at 42.88 lakh hactares against corresponding period of 2013-14(52.50 lakh hactares).
- **According to IBIS, export of wheat in the first week of November** (03-09 Nov) was around 1.6 Thousand Mt. The major export destination of Indian wheat was Philippines from JNPT port which accounted .36 thousand MT at an average FOB price of \$283.55/Tn .Other countries were U.A.E and Malaysia

International Market Update:

- **Global wheat market continue to trade up** due to severe snow fall in USA and growing fear of crop loss in main wheat belts. Besides buyers who are waiting for stabilization in market enter into the market for fresh buying that encouraged global wheat market in last two weeks. Market is likely to move up in current level as major buyers of US wheat are expected to increase their buying in increasing market, it will remain supportive in the short term despite ample availability and good production prospects.
- **Chicago Board of Trade climbed from last week due** to adverse condition for wheat crop. This year winter season in US is colder than average winter and that could have an impact on yield of wheat crop. Market may test the first resistance level of 590 cent per bushel in the short term.
- **Morgan Stanley reduced its price forecasts for wheat** because global surpluses are larger than current expectation and said rates will probably fall to a level that may curb supplies in high-cost producers Australia. The bank cut its estimate for Wheat to \$5.40 a bushel from \$5.75. Wheat lost 15 percent as global production climbed to the highest ever, according to the U.S. Department of Agriculture. World grain reserves will touch a 15- year high and weigh on wheat prices, according to Abdolreza Abbassian, senior economist at the United Nations' Food & Agriculture Organization.
- **The U.S. Department of Agriculture on their latest report** cut its forecast for global wheat production with an increase in the EU crop more than offset by cuts for Australia, Kazakhstan and North Africa.

Domestic market Outlook:

Wheat cash market is likely to trade steady to firm.
