

Wheat Domestic Fundamentals:

- **With decreasing temperature and almost favorable weather in major wheat** growing areas wheat production is likely to improve this year despite lower sowed area in major states like Madhya Pradesh and Uttarakhand. Overall wheat area till 12th December, 2014 lags behind by around 4 percent. Area under wheat crop has been registered at 241.91 lakh ha against 251.32 lakh ha in the second week of December.
- **Lower wheat area coverage in Madhya Pradesh has been the major cause** of concern at this point of time and sowing has entered in the last phase here. So it would be very difficult to get recovery in overall wheat area in this state. Area under wheat in the state has been registered at 41.42 lakh ha against 48.89 lakh ha last year, almost 15 percent lower than last year. However, area under wheat in Rajasthan has increased by 5 percent till date. It is likely to compensate loss in Madhya Pradesh to some extent. Wheat area in Rajasthan has been 25 lakh ha so far. In other states progressive sowing is normal and crop condition is good to satisfactory till now.
- **According to IBIS, export of wheat in the second week of December** (08-14 Dec) was around .49 Thousand Mt. The major export destination of Indian wheat was UAE from Mundra port which accounted .12 thousand MT at an average FOB price of \$363.01/Tn. Other countries were Jordan and Malaysia.
- **Wheat stock in govt.'s granary on 01st December was recorded at 27.20 million tonne** against 30.13 million tonne on 1st November, 2014. India needs 8.2 million tonne wheat as buffer stock and 3 million tonne as strategic reserve as on 1st January, 2014. Actual holding with govt. is at comfortable stage and supply side would be ample throughout the season.
- **Wheat prices remain almost stable throughout the country** and no major upheavals are expected at this point of time. Recent rains in various wheat growing belts have ensured better growth of the standing crop especially in Punjab, Haryana, Uttar Pradesh and Rajasthan. Decreasing temperature in growing belt too is beneficial for the wheat crop.

International Market Update:

- **Egypt had purchased 180000 tonnes of wheat from Russia & France** at an average price of \$262.92/tonne CiF which has to be delivered between 11-20 January. Till now from July 1st, Egypt has bought 2.605 million tonnes of wheat from the international market, in 2013-14 Egypt had purchased 5.46 million tonnes of wheat from abroad in addition to 3.7 million tonnes of local wheat.
- **Olam International offers the lowest bid at \$268.47 a tonne (CiF)** among 5 bidders to sell 50,000 tonnes of wheat to Bangladesh. Wheat has to be shipped within 40 days after the approval of Bangladesh purchase committee. Bangladesh is planning to import 900,000 tonnes of wheat in the current fiscal year starting from July that includes 250,000 tonnes of Ukrainian wheat at \$297.50 a tonne (CiF) and other port-related expenses in a government-to-government deal with Ukraine.
- **The U.S. Department of Agriculture on their latest report** raised its forecast for global wheat production with an increase in the Canada and Kazakhstan crop more than offset by cuts by global beginning stock.

Domestic market Outlook:

Wheat cash market is likely to trade steady to slightly firm.
