

Wheat Domestic Fundamentals:

- **According to IBIS, export of wheat in the fourth week of January (19-23 Jan)** was around 1138 MT. The major export destination of Indian wheat was China from Mundra port which accounted 648 MT at an average FOB price of \$309.95/Tn .Other countries were UAE and Jordan.
- **As of now Wheat area has slightly decreased by around 3%** in comparison to last year till date .As per latest update by agriculture ministry wheat coverage during 2014-15 has been registered at 305.6 lakh hectares against corresponding period of 2013-14(313.69 lakh hectares).
- **The global wheat market gained in recent weeks considerably** on the back of likely imposition of export tax by Russia from 1st February, 2015. Besides, weather concern also lent support to global wheat market in recent days. Prices moved from around \$250 to \$280 per tonne in last one month. Recent gains in global wheat market have provided export opportunity for India once again. However cheaper supply from EU and prevailing higher prices in domestic market remain a major constraint for Indian exporters.
- **Wheat stock in govt.'s granary on 15th January** was recorded at 24.01 million tonne against 25.11 on 01st January. India needs 8.2 million tonne wheat as buffer stock and 3 million tonne as strategic reserve as on 1st January, 2014.Actual holding with govt. is at comfortable stage and supply side would be ample throughout the season.
- **Wheat crop in major growing regions has been satisfactory so far** under favorable weather condition except Doaba region of Punjab and Karnal in Haryana, where news regarding spreading of yellow rust is surfacing on ground. As temperature remains at lower level at night and lack of sunshine in day may create congenial condition for yellow rust spread in Muktsar and Faridkot. Farmers in these areas, who have not adopted resistance varieties, need to be careful for next two-three weeks.
- **In some major growing area of Punjab and Haryana wheat leaves have turned pale** due to chill and foggy weather. Next two to three weeks are very crucial for ensuring better growth of the standing crop. Agriculture department expects better weather condition in the weeks ahead. Recent rains have increased hope of sunny days ahead and it hints towards bumper crop once again.

International Market Update:

- **The Ukrainian government and traders have agreed that no more than 1.2 million tonnes** of Ukrainian milling wheat will be exported between Jan. 1 and June 30.The volume will fulfill all their export obligations in which sales of milling wheat will not exceed 900,000 tonnes in the first quarter in 2015 and 300,000 in the following three months.
- **They have taken this decision as Ukraine wheat demand will increase** and their domestic prices as well as Russia has restrained their wheat export. Ukraine harvested a record 24.1 million tonnes of wheat in 2014 and its domestic consumption does not exceed 12 million tones therefore the agreed memorandum will not allow wheat exports to exceed 12.8 million tonnes this season, which runs from July to June as they have exported around 8.5 million tonnes of wheat so far this season.
- **Algeria's state grains agency OAIC bought around 2.50 – 3.50 tonnes of milling wheat** at an average price of \$256/tonne (CiF) which has to be delivered in May. The origin is optional but it may come from France and Germany, according to a trader.

Domestic market Outlook:

Wheat cash market is likely to trade in range bound.
