

### Wheat Domestic Fundamentals:

- **New wheat crop in Swarashtra region of Gujarat is expected to hit the market** by 20th February followed by Madhya Pradesh wheat. New arrival, lower export demand and continuous wheat release from central pool stock would not allow market to go for any bull run. However, wheat crop size in Gujarat is smaller and it would not impact wheat prices in other states.
- **Wheat crop in major growing region in India is in good condition** and recent rains in Punjab, especially in Faridkot and Bathinda region have benefited the late shown crop and it would ensure better growth for standing crop. Recent rainfall has given much needed respite to the wheat farmers in the region, they can apply fertilizers like urea to the wheat crop without irrigation. Moisture level in field has increased and there is no need of canal irrigation immediately.
- **According to IBIS, export of wheat in the fifth week of January (26 Jan-01 Feb)** was around 1313 MT. The major export destination of Indian wheat was UAE from Mundra port which accounted 688 MT at an average FOB price of \$302.10/Tn .Other countries were Malaysia and China.
- **Wheat cash markets in India trades range bound and any jump from current level** is unlikely due to smooth supply side from central pool stock and virtually negligible demand for export. Besides, crop condition is satisfactory so far and better yield is expected this year on the back of favorable weather condition throughout the growing regions.
- **As of now Wheat area has slightly decreased by around 3%** in comparison to last year till date .As per latest update by agriculture ministry wheat coverage during 2014-15 has been registered at 305.6 lakh hectares against corresponding period of 2013-14(313.69 lakh hectares).
- **The global wheat market gained in recent weeks considerably** on the back of likely imposition of export tax by Russia from 1st February, 2015. Besides, weather concern also lent support to global wheat market in recent days. Prices moved from around \$250 to \$280 per tonne in last one month. Recent gains in global wheat market have provided export opportunity for India once again. However cheaper supply from EU and prevailing higher prices in domestic market remain a major constraint for Indian exporters.

### International Market Update:

- **Tunisia continues to buy wheat to meet its requirement.** Its grain agency has invited international tender for 1.17 lakh tonne for soft milling wheat. European trades have said that delivery for this wheat is sought in March and April. More tenders is expected in mid Feb-2015.Timing of delivery may vary depending on sourcing countries.
- **The Ukrainian government and traders have agreed that no more than 1.2 million tonnes** of Ukrainian milling wheat will be exported between Jan. 1 and June 30.The volume will fulfill all their export obligations in which sales of milling wheat will not exceed 900,000 tonnes in the first quarter in 2015 and 300,000 in the following three months.
- **They have taken this decision as Ukraine wheat demand will increase** and their domestic prices as well as Russia has restrained their wheat export. Ukraine harvested a record 24.1 million tonnes of wheat in 2014 and its domestic consumption does not exceed 12 million tones therefore the agreed memorandum will not allow wheat exports to exceed 12.8 million tonnes this season, which runs from July to June as they have exported around 8.5 million tonnes of wheat so far this season.
- **Algeria's state grains agency OAIC bought around 2.50 – 3.50 tonnes of milling wheat** at an average price of \$256/tonne (Cif) which has to be delivered in May. The origin is optional but it may come from France and Germany, according to a trader.

**Domestic market Outlook:** Wheat cash market is likely to move range bound.
