

Wheat Domestic Fundamentals:

- **According to the latest report of USDA Indian wheat export** may come to 2 MMT due to uncompetitive prices and expectations of no government wheat exports. However, according to Agriwatch estimate Indian wheat export may reach to 3MMT due higher production and good demand of quality wheat like Tukda and Lokwan.
- **According to second advance estimate released by Indian government** wheat production may reach to 95.76 MMT which is around 2 percent higher than the first estimate of 94.00 MMT .They have increased the wheat production estimate due to expectation of higher yield in major growing area despite lower area coverage as compare to last year.
- **According to IBIS, export of Indian wheat in the fourth week of February** (23-01 Feb-Mar) was around 2086 T at an average FoB price of \$297.13/tonne. The major export destination of Indian wheat was UAE from Mundra port which accounted 388 MT at an average FOB price of \$298.88/Tn .Other major countries were Malaysia and Oman.
- **New wheat crop in Ganganagar region of Rajasthan** is expected to hit the market by first week of April. Wheat area in this region may have decreased around to 7-8% from last year due to lesser availability of canal water. Overall condition of wheat plant is good and farmers are expecting higher yield than last year.
- **Fewer water supplies from the canal and increasing temperature** in the maturity stage may affect the yield of wheat in the Rajkot region as it will make the seed to shrink more. As per farmers feedback area of wheat has decreased around 6-7 percent from last year and harvesting may start from 1st week of March.
- **As per latest update from farmers and traders, new wheat crop in Bhilwara region of Rajasthan is expected to hit the market** by last week of March. Wheat area in this region may have increased around to 10-12% from last year as late rainfall had discouraged farmers to plant mustard. However, wheat acreage in Rajasthan has decreased from last year. Overall condition of wheat plant is good and farmers are expecting higher yield than last year.
- **According to the state-wise target of wheat to be purchased from farmers** during the Rabi marketing season, Punjab is expected to purchase 12 MMT of wheat in 2015-16 against 11.64 MMT in 2014-15 and Haryana 7 MMT in 2015-16 against 6.45 MMT in 2014-15. Procurement estimate for Madhya Pradesh is 6 MMT, Uttar Pradesh 3 MMT and Rajasthan 1.8 MMT. The targets were fixed at a meeting of food secretaries.

International Market Update:

- **Frigid temperatures likely caused spotty freeze damage to winter wheat** in parts of the U.S. Plains. Temperatures fell as low as minus 22 Celsius in parts of south-central Nebraska and north-central Kansas where most of wheat areas lacked a protective layer of snow cover. The situation has firmed Chicago wheat futures after falling to three-week lows.
- **International Grains Council in its monthly report raised EU wheat** export forecast to 30.3 million tonnes in 2014-15, up from a previous estimate of 29.7 million. They have also revised down U.S. wheat export to 24.0 million tonnes from a previous forecast of 25.0 million.
- **A group of Israeli private buyers has purchased 25,000 tonnes of feed wheat** at an average price of \$210/tonne CiF which has to be delivered between 01-20 April. Wheat is likely to be sourced from Black Sea Region.
- **Egypt had purchased 1, 80,000 tonnes of wheat from France** and 60,000 tonnes of wheat from Romania at an average price of \$240.25/tonne CiF which has to be delivered between 15-25 March. Till now from July 1st, Egypt has bought 3.86 million tonnes of wheat from the international market.
- **Algeria's state grains agency OAIC bought 4 tonnes of milling wheat** at a price around \$237-\$238/tonne (CiF) which has to be delivered in June. The origin is optional but it may come from France, according to a trader.

Domestic market Outlook: Wheat cash market is likely to be steady.
