

Wheat Domestic Fundamentals:

- **According to IBIS, export of Indian wheat in the first week of March** (02-08 March) was around 931 MT at an average FoB price of \$302.10/tonne. The major export destination of Indian wheat was Malaysia from Mundra port which accounted 364 MT at an average FOB price of \$272.33/Tn .Other major countries were UAE and Sri Lanka.
- **Loss in Punjab may be even higher than Haryana** as at least 7 districts has been affected in Punjab while three districts got affected in Haryana. Here crop loss percentage may be 5 to 8 percent and it has dashed the hope of record production and yield this year.
- **Punjab has targeted 168 Lakh tonne wheat production in 2013-14** .With timely sowing, favorable weather and disease free crop had increased the aspiration of record crop this year, over 2011-12,when 180 Lakh tonne wheat was produced. Punjab share in total production was 176 Lakh tonne last year. If we consider current loss Punjab would produce not more than 162 Lakh tonne this year.
- **Despite reported news of considerable crop loss in Rajasthan** due to recent rains, hails storm and strong wind and growing fear of lower yield in Rajasthan final size of the wheat crop may improve. The actual loss has been witnessed in flooding area which is only 5 percent of planted wheat area in Rajasthan. Feedback received from farmers from Sri Ganganagar, Hanumangarh hints recovery in yield in these regions.
- **Wheat crop in Baran , Bundi and Kota regions has flattened** with recent rains/strong wind and loss percentage in these region is assessed around 8 to 10 percent. The loss may increase if two-three spell of more rains lash again in these growing regions .In terms of overall Rajasthan total loss so far may be 4 to 5 percent that is a normal phenomenon.
- **According to second advance estimate released by Indian government** wheat production may reach to 95.76 MMT which is around 2 percent higher than the first estimate of 94.00 MMT .They have increased the wheat production estimate due to expectation of higher yield in major growing area despite lower area coverage as compare to last year.

International Market Update:

- Bangladesh's state grains buyer received the lowest offer of \$243.69/tonne CIF for 50,000 tonne from Phoenix Commodities. Other offers were \$243.95 and \$254.90 a tonne CIF. The offers must remain valid until March 25 and has to be shipped within 40 days after contract signing.
- **Global Wheat Supply May Increase due to expectation** of higher production. According to a Reuters' poll, USDA may raise the estimate of wheat ending stocks to 699 million bushels for 2014/15, up from 692 million bushels of February.
- **Frigid temperatures likely caused spotty freeze damage to winter wheat** in parts of the U.S. Plains. Temperatures fell as low as minus 22 Celsius in parts of south-central Nebraska and north-central Kansas where most of wheat areas lacked a protective layer of snow cover. The situation has firmed Chicago wheat futures after falling to three-week lows.
- **International Grains Council in its monthly report raised EU wheat** export forecast to 30.3 million tonnes in 2014-15, up from a previous estimate of 29.7 million. They have also revised down U.S. wheat export to 24.0 million tonnes from a previous forecast of 25.0 million.
- **A group of Israeli private buyers has purchased 25,000 tonnes of feed wheat** at an average price of \$210/tonne CiF which has to be delivered between 01-20 April. Wheat is likely to be sourced from Black Sea Region.
- **Egypt had purchased 1, 80,000 tonnes of wheat from France** and 60,000 tonnes of wheat from Romania at an average price of \$240.25/tonne CiF which has to be delivered between 15-25 March. Till now from July 1st, Egypt has bought 3.86 million tonnes of wheat from the international market.

Domestic market Outlook: Wheat cash market is likely to be steady to slightly weak.
