

Wheat Domestic Fundamentals:

- Wheat stock in govt.'s granary on 16th March was recorded at 18.85 million tonne against 19.52 million tonne on 1st March, 2015.
- Rains occurred in the last week of February accompanied by strong wind and hailstorm and its repetition in mid March have dashed the hope of bumper wheat production in 2015. Wheat quality in Gujarat is said to be affected considerably and almost 75 percent wheat has suffered from quality problem. Grains have lost natural colour and quality properties. Even production is said to be 10 to 12 percent lower from last year. Almost 70 percent harvesting is over in Gujarat.
- News of crop loss from Uttar Pradesh too is gaining ground in western Uttar Pradesh. As wheat crop in these states are in grain filling stage, quality of the crop is likely to be unaffected. However, flattening of crop may reduce yield in Western Uttar Pradesh. The loss may be 3 to 5 percent in this region. There is no report of any loss from Bihar. Recent rains are said to be beneficial for the standing crop.
- Emerging scenario hints overall crop loss may be in the region of 3 to 4 million tonne. Premium quality may move up from current level and short supply of these quality may be seen June onward. Procurement agencies too would not be able to procure quality crop this year. Farmers hope some relaxation in procurement norms this year.
- According to IBIS, export of Indian wheat in the second week of March (09-15 March) was around 1806 MT at an average FoB price of \$291.43/tonne. The major export destination of Indian wheat was UAE from Mundra port which accounted 700 MT at an average FOB price of \$304.77/Tn. Other major countries were Malaysia and Taiwan.
- Wheat crop at almost harvesting stage in MP is not showing good sign with Lessing out of fresh showers of recent rains and hailstorms. These developments have affected the normal quality of grains negatively. Crop loss assessment continues and clear picture would come by the end of this week. Grains of harvested crop have discolored and have lost to receive the hope of premium price. Premium quality wheat is being traded at Rs 1800 per quintal while normal quality is sold out in the range of Rs 1400-1450 / quintal. The lack luster grains are being traded Rs1200-1300/ quintal.
- Bad weather and unseasonal rains has badly affected wheat crop in Gujarat. Traders fear that 75% of new crop has almost discolored, however yield is considered to remain almost normal. Sourcing quality wheat in Gujarat market this year could not be easy and millers would have to pay premium price for quality wheat. Maximum wheat (almost 80%) is likely to be consumed by millers and traders say that for branded segment millers would have to adopt import option for quality wheat in south India.

International Market Update:

- Korea's largest feed maker, Nonghyup Feed Inc. (NOFI), purchased 53,000 tonnes of feed wheat at \$205.88/tonne c&f plus a \$1.50 a tonne surcharge for additional port unloading for September shipment. The wheat can be sourced from the Black Sea region, United States, Canada, Australia.
- Russia's new wheat crop is expected to hit the local market by June end. Standing crop is in good condition and bumper production prospect looms large given the normal weather condition over the main growing regions. Market experts see wheat price to decrease by 9 percent in next three months. Wheat having 12.5 percent moisture content might be available at \$205 per tonne on FOB basis by the end of June. This year prices of old crop is hovering in the range of \$225 to \$226 per tonne on a Fob Black Sea Basis. In the first week of March around 51,000 tonne wheat from Russia has been exported. Since the beginning of the current MY Russia has exported around 19 million tonne wheat.
- U.S. wheat futures are going northward on concerns over potential yield losses due to dry weather across key producing regions in the country but there is a possibility of rain after a week and is expected to push the prices down. However, if the weather remains the same the uptrend may continue.
- Bangladesh's state grains buyer received the lowest offer of \$243.69/tonne CIF for 50,000 tonne from Phoenix Commodities. Other offers were \$243.95 and \$254.90 a tonne CIF. The offers must remain valid until March 25 and has to be shipped within 40 days after contract signing.

Domestic market Outlook: Wheat cash market is likely to be steady to weak.
