

### Wheat Domestic Fundamentals:

- **Wheat arrivals in various markets start gaining momentum** with the opening of weather in Punjab and Uttar Pradesh. Harvesting of early sown crop commences in Uttar Pradesh while in Punjab and Haryana its running smooth. In a latest development Punjab govt. has imposed a ban on wheat harvesting with combine from 7.0pm to 10.0 am and the ban will remain effective till 29th March. The harvesting of crop has been banned during this time to ensure that the produce would be clean and dry as per the norms.
- **Moreover, the state government has announced an incentive** for each district and village, with a financial grant of Rs.1 crore and Rs.1 lakh respectively, which were free from the stubble burning. The decision has been taken for tackling the problem stubble burning.
- **Wheat production in Punjab is bound to decline** now from expected 180 lakh tonne to 168 lakh tonne due to inclement weather and water lodging in the field at the time of maturity. The average yield is expected to go down by 5-7 per cent this year. The state government has made arrangement to procure 125 lakh tonne wheat this year. Unseasonal rains have delayed harvesting by two weeks and quality of grain too have damaged considerably. Chief Minister of the state has already appealed the Central Government to help farmers by extending a bonus of Rs 100 per quintal.
- **According to IBIS, export of Indian wheat in the last week of March** (23-29 March) was around 2876 MT at an average FoB price of \$299.58/tonne. The major export destination of Indian wheat was Taiwan from Pipavav port which accounted 1249 MT at an average FOB price of \$259.39/Tn .Other major countries were Malaysia and UAE.
- **Flour millers in central India are trying to source wheat from open market** and from central pool as quality of new wheat is below expectation. They pay higher for quality wheat at this point of time. New crop will be available from 20<sup>th</sup> April in Uttar Pradesh and Bihar. However, local mills would use inferior grade taking advantage of lower price than MSP. Wheat availability for feed industry would increase.
- **South Indian flour millers had imported wheat from Australia** sensing the shortage of quality grains in major sourcing states like Madhya Pradesh and Rajasthan. Almost 80,000 tonne prime wheat has been brought from Australia at \$260/265 per Tonne on CIF basis(Tuticorin) for April/May delivery.

### International Market Update:

- **Wheat prices in local markets in Russia continued to decline** due to appreciating rouble, ample availability of stock in major growing regions and increasing seasonal supply .Farmers started selling wheat to get cash for spring sowing. Black Sea prices for wheat with 12.5 percent protein content were down \$3 on the week at \$197-\$202 per tonne on a free-on-board (FOB) basis. Third grade wheat is being traded at \$172 per tonne in the European port of Russia.
- **Russia's grain stocks to reach 15 million tonnes at the end of this marketing year** on June 30, up from 9-10 million tonnes in the last two seasons.The tax on wheat exports that took effect on Feb. 1 is due to be removed after June 30. But Deputy Prime Minister Arkady Dvorkovich, who is in charge of the agriculture sector, said on Friday that the government may extend it.
- **U.S. wheat futures are going northward on concerns over potential yield** losses due to dry weather across key producing regions in the country but there is a possibility of rain after a week and is expected to push the prices down. However, if the weather remains the same the uptrend may continue.

**Domestic market Outlook:** Wheat cash market is likely to be steady to firm.
