

### Wheat Domestic Fundamentals:

- **Wheat cash markets traded mixed on Monday amid** firm sentiment prevailing in the market. Shortage of quality crop restricts market to decrease. Flow of arrival too has declined this week. Farmers too have started restricting release of quality crop to get better price July onwards.
- **Likely shortage of quality seeds of wheat in the rabi season-** 2016, the Punjab state agriculture department has asked the experts to look for a way out. The state requires 35 lakh quintal seeds to be sown over 35 lakh hectares - 40-50 kilogram for an acre and about a quintal for a hectare (which is equal to 2.45 acres).
- **Agriculture statistics Division, DES has released Third Adv estimates** of Production of foodgrains for 2014-15 on 13.05 2015. It has revised wheat production estimate down by 4.9 MMT to 90.78 MMT. In second Adv Est. production was estimated at 95.76 MMT. The drastic decrease in third Adv. Est is mainly attributed to inclement weather conditions in March and April. India has produced 95.85 million tonne wheat in 2013-14.
- **According to IBIS, export of Indian wheat from 4th to 10th May, 2015 was registered at** around 15215.14 MT at an average FoB price of \$265.36./tonne, basis Kandla. The major export destination of Indian wheat were Taiwan, UAE from Pipavav/Kandla port.
- **Exporters buying are not very encouraging as parity is** negative for Indian wheat exporters. However some export is being taking place in countries like Taiwan, UAE, Indonesia and Philippines at an average FOB price of \$265.44 Per tonne, basis Kandla.
- **Total wheat procurement was registered at 241.96 lakh tonne** as on 13.05.2015 against 248 lakh tonne till date last year. Punjab has contributed 94.79 lakh tonne so far, followed by Haryana 66.26 lakh tonne. M.P. contribution stands at around 61.83 lakh tonne. Rajasthan have procured 9.14 lakh tonne.

### International Market Update:

- **The USDA has estimated its initial global wheat ending stock for 2015-16** at 203.32 million tonne, up by 2.35 million tonne estimated for 2014-15 crop. It is higher than pre trade estimate of 194.2 million tonne.
- **Global wheat production for 2015-16 has been projected at 718.93 million tonne.** However it is lower than the estimate of 726.45 million tonne estimated for 2014-15. If the forecast materialises, it would be the second highest record of global wheat production.
- **Russia is ready to increase wheat export by doing away** with export tax from Mid May, 2015. Higher production size this year accompanied by huge carryout around 7.4 million tonne (5 years average 5.5 million tonne) and eased pressure of inflation have encouraged govt to end tax on wheat shipment. Wheat prices are under pressure and higher export is the only option to lighten the pressure on price for the next crop.

### Domestic market Outlook: Wheat cash market is likely to trade steady to slightly firm
