

Wheat Domestic Fundamentals:

Wheat cash market trades slightly up on lower arrivals in cash market. Local millers are active in cash market and intend to take delivery in NCDEX to cover their immediate needs. Govt. would start releasing wheat from central pool stock from this month. However, quality issue may discourage bulk buyers to go for any bulk buying.

India has exported 3432.95 tonne wheat in the fourth week of June till 28th. at an ave FOB price of \$273.75 per tonne. During the same period wheat import was registered at 27,500 tonne at an Ave CIF of \$268.78 per tonne. Wheat has been imported from Australia and is likely to continue as deals have already been struck..

Total wheat procurement was registered at 276.19 lakh tonne as on 25.06.2015 against 270.68 lakh tonne till date last year. Punjab has contributed 99.52 lakh tonne so far, followed by Haryana 67.55 lakh tonne. M.P. contribution stands at around 72.61 lakh tonne. Rajasthan has procured only 12.95 lakh tonne. Overall procurement is up by 0.46 percent this year

Market sources say that half out of 5 lakh tonne contracted (in between \$255 to \$275 per Tonne) so far and more than one lakh tonne has already landed in India. The remaining quantity is scheduled to reach India in July. Market has witnessed two new developments this year. Firstly, wheat import is taking place in vessels and south Indian millers are in process of buying wheat from Russia and France.

Agriculture statistics Division, DES has released Third Adv estimates of Production of foodgrains for 2014-15 on 13.05.2015. It has revised wheat production estimate down by 4.9 MMT to 90.78 MMT. In second Adv Est. production was estimated at 95.76 MMT. The drastic decrease in third Adv. Est. is mainly attributed to inclement weather conditions in March and April. India has produced 95.85 million tonne wheat in 2013-14.

International Market Update:

IGC has revised global wheat production estimate down by 4 million tonne to 711 MMT for 2015-16. The main reason for downward revision is mainly attributed to lower production in India (from 91 to 89 MMT now), Australia (from 27 to 25.5 MMT) and EU (from 150 to 148.5 MMT). However, it has revised Ukraine wheat production estimate up from 21 to 22 MMT.

Wheat production forecast in Australia remains unchanged at 23.6 million tonne in 2015-16 despite drought like condition and developing EL Nino pattern. Ukrainian weather forecasters said on Friday they had revised up their forecast for Ukraine's 2015 wheat crop to 24.5 million tonnes from 23.5 million tonnes.

Russia is selling wheat, having 12.5 percent protein content, in forward months from new crop at \$192 per tonne free on board basis. It may move up to \$195 per tonne this week. Domestic prices for third-class wheat were up 125 roubles compared with a week earlier at 9,500 roubles (\$171) per tonne in the European part of Russia on an ex-works basis.

Domestic market Outlook: Wheat cash market is likely to trade range bound.
