

Wheat Domestic Fundamentals:

Wheat export during week ended 20 Nov-2015 was registered at 303.16 tonne at an ave FoB price of \$303.16 per tonne. The highest price realized for Durum variety (\$458.94 per tonne. Export volume decrease by 23.61 % from last week. There is no hope for higher export volume due to disparity. Indian wheat is \$40 per tonne higher than other competitor's quotes. There was no import last week. Higher import duty (25%) remains restrictive for any fresh deal..

Wheat cash markets may move up in the fourth quarter as production will decrease below 88 MMT under current condition. Wheat is being traded at Rs 1500 to Rs 1650 per qtl. in various mandis in central ,north and west Indian markets and firmness may be seen once again if sowing gets delayed by another one week in Bihar and UP.

The factors that may lend support to cash markets are lower area coverage, moisture stress, higher MSP for wheat and increasing fear of lower yield this year. Farmers in Bihar, Uttar Pradesh, M.P and Rajasthan may shift some wheat area to others lucrative cash crops like Mustard, Chana, Maize, Potato and other green vegetables due to lower rainfall and resultant lower soil moisture level. Around 3 to 4 percent lower area coverage seems very much in sight. It may end up with 29 million ha.

Wheat has been sown only in 79 lakh ha so far against normal of 110 lakh ha, almost lower by 28 % from previous year as on 20,Nov-2015. It would be very difficult to cover normal area and late sowing would reduce yield of wheat crop considerably -it is feared now. Rainfall for the country as a whole has been 35 per cent below normal rainfall during October 1 to November 11. Coming after a 14 per cent deficient monsoon season (June-September), the possibility of a poor rabi crop, after lower kharif production would definitely reduce yield and final crop size.

India increases MSP of wheat by 5.2 percent from Rs 1450 to Rs 1525 for MY 2016-17. Earlier CACP had recommended to hike wheat MSP By Rs 75 per qtl. Govt buys wheat and rice every year to maintain buffer stock and for distribution for various welfare schemes.

Agricultural Statistics Division, Directorate of Economics & Statistics (DES) has released First Adv. Estimate for kharif crop for 2015-16 on 16th Sept,2015. Production target for wheat in Rabi has been set at 94.75 lakh tonne. In fourth adv. estimate it has revised wheat production estimate for 2014-15 to 90.78 lakh tonne. Notably, India has produced 95.85 million tonne wheat in 2013-14.

International Market Update:

Winter wheat planting is 96% complete, compared to 94% last week and a 100% five-year average. Ninety percent of the crop is emerged, compared to 87% last week and a 90% five-year average. Out of them 53% of winter wheat has been rated good-to-excellent. Overall condition have improved significantly and US may expect good crop this year.

IGC has revised world wheat production forecast down by 1 MMT from 727 to 726MMT in end Oct ,2015. Global trade figure too has been revised up by 1 MMT from 149 MMT to 150 MMT. Consumption has been pegged 1 MMT lower to 718 MMT. World carry over stock has been decreased by 2 MMT to 209 MMT..Overall outlook for global wheat market remains bearish in the short to medium term.

Rough weather in Ukraine may impact wheat export in 2016-17 and it may decrease to 3.5 MMT. This year(2015-16) Ukraine may export 16.5 MMT wheat. Ukraine,s eastern, central and southern regions are facing dry weather and farmers left 11 percent area out of normal unsowed. Production estimate has been cut by 8 percent to 17.5 percent.

Domestic market Outlook: Wheat cash market is likely trade range bound with weak bias likely to continue
