

Wheat Domestic Fundamentals:

Wheat cash and futures markets traded almost unchanged and will continue to trade range bound in the near term. Wheat may trade firm in new year as market is aware of lower area coverage ,weak production prospects and expectation of delayed arrivals.

Sowing of Rabi crop has been delayed at least by two weeks and it may affect yield for late sowed wheat. The late onset of winter and exceptionally dry conditions after the weak monsoon and 25 percent lower post winter rains have prompted late crop sowing by farmers. Given the abnormal weather condition Rabi production is bound to decrease this year.

All India Wheat area coverage was reported 26.88 % lower than last year as on 04.12.2015.As per latest sowing progress release total wheat area till 4th Dec-2015 was registered at 152 .56 lakh ha against 208.64 lakh ha last year.It was lagging behind by 27.39 percent last week. Slight improvement in coverage area has been noticed.It increased from 117 to 156 lakh ha in last one week.

Wheat coverage area in all major states except Punjab is running way behind from last year.Uttar Pradesh has covered 40.85 lakh ha till 4th ,Dec-2015,lower by42.65 % from last year.It had covered 71.23 lakh ha last year till 4th dec-2014.Madhya Pradesh has covered only 24 lakh ha against39.23 lakh ha last year,lower by38.82 % so far. Rajasthn, Gujarat have covered 18.26(19.75 (last year) and 2.99(5.19)lakh ha so far, lower by 42.28 % till 4th December-2015.Haryana has covered 20.00 lakh ha against22.36 lakh ha last year,lower by 10.55 %. Punjab is the only state where wheat sowing is running ahead of schedule and it has covered 31.36 against 29.9 lakh ha so far.It is higher by 4.88 %.Situation is even worse in Bihar where only2.84 lakh ha area has been covered so far , lower by63.40 % till 4th Dec-2016.

India exported 471.60 tonne wheat during the week ending 29th Nov-2015 at an average price of \$303.55 per tonne. Around 200 kg wheat has been imported from Maxico by air during the same period and it landed in Delhi last week as per IBIS data. Ave CiF was registered at \$122.34 per tonne. However, there is no parity for wheat import and volume would remain negligible in the months ahead. There was no export-import last week.

Agricultural Statistics Division, Directorate of Economics & Statistics (DES) has released First Adv. Estimate for kharif crop for 2015-16 on 16th Sept,2015. Production target for wheat in Rabi has been set at 94.75 lakh tonne. In fourth adv. estimate it has revised wheat production estimate for 2014-15 to 90.78 lakh tonne. Notably, India has produced 95.85 million tonne wheat in 2013-14.

International Market Update:

Ukraine Agriculture ministry has revised its grain production estimate up by0.5 MMT to 61 MMT for 2016.Weather turns favorable and winter wheat crop condition has improved considerably in recent weeks.A few weeks ago more than 30 percent of the crop was in a poor state while now the acreage of poor crop is not more than 17 percent

Australia has revised its wheat production estimate down by5.1 % to 24 MMT in 2015-16 due to El Nino impact that has affected yield. Earlier In Sept it had estimated 25.3 MMT wheat production. Last year Australia had produced 23.7 MMT. Winter-crop harvesting is largely complete across Queensland and is progressing in other states.

IGC wheat production estimate remained unchanged this month too at 726 MMT. However, trade estimate has been revised up by 1 MMT to 151 MMT. Consumption estimate has been raised from 718 to 720 MMT in the month of Nov-2015. Similarly carryout stock has been revised 1MMT down from 209 to 208MMT.

Domestic market Outlook: Wheat cash market is likely trade steady to range bound.
