

Wheat Domestic Fundamentals:

Wheat cash market trades lower on recovery at area front and better supply side from central pool and private trade. Market is likely to trade steady to slightly weak in the short term. However, overall tone remains firm due to likely shortfall in production and late harvesting. Weather too remains unpredictable and temperature in March, April would be crucial once again.

Overall wheat area coverage was registered at 281.7 lakh ha, lower by 5.89 % from last year till 8th January. All India wheat coverage was registered at 299.33 lakh ha last year. Gujarat, Uttar Pradesh, Madhya Pradesh and Maharashtra lag behind considerably so far. The sowing season has entered in last phase and no recovery is expected now.

Agriwatch has revised wheat production estimate down by 3.62 MMT to 85.32 MMT for 2016-17 MY starting from April-2016. Crop size may be revised down further if weather turns unfavourable in March –April once again like last year. Carryout for 2016-17 would decrease from 13.99 to 5.81 MMT, the lowest in a decade.

At export front, opportunity for Indian wheat exporters is not favourable due to cheaper availability of wheat in the global market. Price difference is wider, around \$50/55 per tonne. Russia, Australia and Argentina are offering wheat at \$190 to \$205 per tonne on FoB basis. Against it, India FoB quotes at current price come to \$152/155 per tonne when it is sourced from Saurashtra Region Of Gujarat.

India exported 528.24 tonne wheat during week ended 3rd Jan-2016 at an average FoB of 324.52 per tonne The highest and lowest quotes were \$393.66 and \$287.81 per tonne. Major buyer was UAE. Wheat import increased to 18175 tonne at an average CiF of \$260.86 per tonne in the same period. Higher and lower quote was almost same. Wheat has been imported from Australia and landed at Cochin Sea

Agricultural Statistics Division, Directorate of Economics & Statistics (DES) has released First Adv. Estimate for kharif crop for 2015-16 on 16th Sept, 2015. Production target for wheat in Rabi has been set at 94.75 lakh tonne. In fourth adv. estimate it has revised wheat production estimate for 2014-15 to 90.78 lakh tonne. Notably, India has produced 95.85 million tonne wheat in 2013-14.

International Market Update:

IGC wheat production estimate remained unchanged this month too at 726 MMT. However, trade estimate has been revised up by 1 MMT to 151 MMT.

Argentina has revised its grain export policies and it would encourage farmers to grow more wheat and corn now. Export permit policy has been cancelled. Export tax too has been removed on corn and wheat. Local farmers had reduced their wheat and corn area under export permit system and lower price. Now they will double their area under wheat and corn-say experts.

Domestic market Outlook: Wheat cash market is likely trade range bound with firm bias likely to continue..
