

Wheat Domestic Fundamentals:

More or less wheat cash market traded steady on Thursday.

Weather remains favorable for wheat in central and western part of India and the crop condition is said to be good in that region despite lower area coverage excluding Rajasthan. However, condition is not normal in north India where day temperature is higher than 21 Degree Celsius while temperature in night remains favorable for standing wheat crop. If mercury continues to hover higher in day in Feb and Mar, yield in Punjab and Haryana might be affected.

As of now wheat quality and yield in M.P. is good and new arrival is expected to increase by the end of this month. Daily arrival from new crop in Madhya Pradesh has been reported at around 4000 bags and is being traded at Rs 1650 to Rs 1775 per qtl. Arrival in Gujarat is expected to commence in the last week of February.

India exported 529.03 tonnes of wheat during week ended 7th Feb -2016. Average FoB quote realized last week was \$325.17 per tonne. As prices are ruling lower in global market export opportunity for Indian wheat exporters seems bleak. There was no import during week ended 7th Feb-2016.

Agriwatch has revised wheat production estimate up by 4.26 MMT from 85.32 MMT to 89.58 MMT for 2016-17 MY starting from April-2016. Temperature in Feb & March may affect yield where wheat has been sown late. Carryout for 2016-17 would decrease from 13.99 to 9.57 MMT, the lowest in a decade.

Sowing is almost over now and total coverage under wheat has been reported at 292.52 lakh ha against 305.94 lakh ha last year, lower by 13.42 lakh ha from last year. Shortfall of 13.42 lakh ha in area and delayed sowing of wheat in Uttar Pradesh, Rajasthan, Maharashtra would impact crop size by 35 to 45 lakh tonne from normal expectation. Temperature in Feb, March and April would be decisive factor for the final crop size in 2016.

As on January 1, the FCI's wheat stock was registered at 240 lakh tonnes, up by 74% as against the 138 lakh tonnes required as per the buffer stocking norms on the same date. Higher availability in open market would restrict firm trend in wheat. Overall availability would be ample to take care of lean season demand.

Agricultural Statistics Division, Directorate of Economics & Statistics (DES) has released First Adv. Estimate for kharif crop for 2015-16 on 16th Sept, 2015. Production target for wheat in Rabi has been set at 94.75 lakh tonne. In fourth adv. estimate it has revised wheat production estimate for 2014-15 to 90.78 lakh tonne. Notably, India has produced 95.85 million tonne wheat in 2013-14.

International Market Update:

IGC revised wheat production estimate up by 5MMT to 731 MMT this month. Trade estimate too has been revised up by 1 MMT to 152 MMT. However, consumption estimate has been revised down by 1MMT to 719 MMT in the month of Jan 2016. Carryout stock has been revised up by 5MMT down from 208 to 213 MMT.

Grain agency of Algeria OAIC has brought around 5 lakh tonne milling wheat through tender in the beginning of February-2016. The deal has been struck at \$178 per tonne on CiF basis. The origin of wheat is France. Some wheat has been purchased from UK too. As prices are ruling lower, so exporters have limited selling. Delivery of this deal is due in April and May.

Argentina has made its presence visible in South Korea and Vietnam by exporting wheat to these countries first time. Cheaper availability of wheat has enabled Argentina to grab opportunity in unusual markets. Around 20,000 T wheat has been brought by SK while 28,600 tonne has been shipped to Vietnam.

Domestic market Outlook: Wheat cash market is likely trade steady to slightly week.
