

Wheat Domestic Fundamentals:

Agricultural Statistics Division, Directorate of Economics & Statistics (DES) has released Second Adv. Estimate for Rabi crop for 2015-16 on 15th Feb, 2016. Production target for wheat in Rabi had been set at 94.75 lakh tonne. Now in Second Adv. estimate it has estimated wheat production for 2015-16 at 93.82 lakh tonne. Notably, India has produced 86.53 million tonne wheat in 2014-15.

Recent showers of rains are said to be beneficial to the standing wheat crop. North India has received light showers of rains and it would ensure better growth of late sowed crop under panicles growth stages. New crop in Madhya Pradesh is being traded around Rs 1560 to Rs 1650 per qtl. Quality and colour of grains are good so far. Pressure may be felt from mid March. Crop condition in Gujarat is average to good and harvesting is expected to commence from mid- March.

The ongoing weather conditions, particularly the maximum day temperature hovering around 22 degrees and night temperatures between six and 12 degrees are ideal conditions for proliferation of the fungal disease.

As of now wheat quality and yield in M.P. are good and new arrival is expected to increase by the end of this month. Daily arrival from new crop in Madhya Pradesh has been reported at around 30,000 bags including Dewas and is being traded at Rs 1550 to Rs 1620 per qtl. Arrival in Gujarat is expected to commence by the end of February.

Only token export are being done right now. India exported 138.36 tonne wheat during week ended 14th February-2016 at an ave price of \$264.84 per tonne. The highest quote received last week was \$285.84 while the lowest quote was registered at \$252.23 per tonne. UAE and Nepal were the major buyers last week. There is no hope for any recovery on export front despite arrival from the new crop is round the corner. There was no import last week.

The govt sets wheat procurement target at 30MMT for RMS 2016-17, almost same as last year. It was decided to procure 300 lakh tons (lt) of wheat during RMS 2016-17. The actual procurement of wheat during RMS 2015-16 was 280.88 lt, in spite of wheat crop getting affected due to untimely rains and hailstorms during last March-April.

Agriwatch has revised wheat production estimate up by 4.26 MMT from 85.32 MMT to 89.58 MMT for 2016-17 MY starting from April-2016. Temperature in Feb & March may affect yield where wheat has been sown late. Carryout for 2016-17 would decrease from 13.99 to 9.57 MMT, the lowest in a decade.

Sowing is almost over now and total coverage under wheat has been reported at 292.52 lakh ha against 305.94 lakh ha last year, lower by 13.42 lakh ha from last year.

International Market Update:

As per USDA, U.S wheat exports at 3,76,500 MT (for the period 29th Jan- 4th Feb, 2016) were up 64 percent from the previous week and 11 percent from the prior 4-week average. The primary destinations were Japan (71,100 MT), Mexico (59,800 MT), Taiwan (55,000 MT), Yemen (43,600 MT), Guatemala (30,700 MT), and the Philippines (27,500 MT).

IGC revised wheat production estimate up by 5MMT to 731 MMT this month. Trade estimate too has been revised up by 1 MMT to 152 MMT. However, consumption estimate has been revised down by 1MMT to 719 MMT in the month of Jan 2016. Carryout stock has been revised up by 5MMT down from 208 to 213 MMT.

Grain agency of Algeria OAIC has brought around 5 lakh tonne milling wheat through tender in the beginning of February-2016. The deal has been struck at \$178 per tonne on CIF basis. The origin of wheat is France. Some wheat has been purchased from UK too. As prices are ruling lower, so exporters have limited selling. Delivery of this deal is due in April and May.

Domestic market Outlook: Wheat cash market is likely to trade steady to slightly weak..
