

Wheat Domestic Fundamentals:

Recent showers of rains in Punjab, Haryana and parts of Uttar Pradesh and Madhya Pradesh have flattened wheat crop and 5% crop in particular regions has suffered but at the same time 30 % crop in UP and other states (late sown) has benefited from this rains. So it is too early to talk about overall crop loss at this point of time. If weather conditions remain favourable now, farmers will be able to salvage crops by draining water from their fields and flattened crop may stand up once again with opening up weather.

New wheat in MP, Rajasthan and Gujarat are being traded at Rs1525, Rs 1500 and Rs 1510 per qtl respectively while arrival were reported at 8000, 2000 and 4000 bags a day. Quality is good so far. Pressure may build up by end March.

Rake loading for south India from Kota region of Rajasthan is being reported at Rs 1870 per qtl. New wheat (FAQ) in Kota is being traded in the range of Rs 1500 to Rs 1650 per qtl. Moisture level content in new grain is over 15 %, so private trades are not active for stock purpose. Local millers are buying based on their immediate requirements.

Despite disparity India exported 570.8 tonne wheat during week ended 6th Mar-2016 against 772 tonne previous week ending 28th. It has been exported at an aveFoB of \$285.02 per tonne. Buyers for the Indian wheat are UAE, Kuwait, Malaysia and Somalia. As prices are ruling higher in domestic market, export pace would remain slow despite new crop being round the corner as global wheat markets offer wheat at very attractive price. There is no import last week.

Agricultural Statistics Division, Directorate of Economics & Statistics (DES) has released Second Adv. Estimate for Rabi crop for 2015-16 on 15th Feb, 2016. Production target for wheat in Rabi had been set at 94.75 lakh tonne. Now in Second Adv. estimate it has estimated wheat production for 2015-16 at 93.82 lakh tonne. Notably, India has produced 86.53 million tonne wheat in 2014-15.

The govt. sets wheat procurement target at 30 MMT for RMS 2016-17, almost same as last year. It was decided to procure 300 lakh tons (lt) of wheat during RMS 2016-17. The actual procurement of wheat during RMS 2015-16 was 280.88 lt, in spite of wheat crop getting affected due to untimely rains and hailstorms during last March-April.

Agriwatch has revised wheat production estimate up by 4.26 MMT from 85.32 MMT to 89.58 MMT for 2016-17 MY starting from April-2016. Temperature in Feb & March may affect yield where wheat has been sown late. Carryout for 2016-17 would decrease from 15.38 to 13.96 MMT, the lowest in seven years..

International Market Update:

Lack Sea prices for Russian wheat with 12.5 percent protein content were at \$184 a tonne on a free-on-board (FOB) basis at the end of last week, up \$4.5 compared with a week earlier. Amid the rouble growth and slow decline in the domestic prices, exporters have to increase prices for the Russian wheat.

IGC revised wheat production estimate up by 1 MMT to 732 MMT this month. Trade estimate too has not been revised and it stayed steady at 152 MMT. Consumption has been pegged at 719 MMT in the month of Feb 2016. Carryout stock has been pegged at 213 MMT.

Russian wheat export price decreased \$3.5 per tonne to \$177.5 per tonne last week as traders were trying to return to more competitive levels amid a decline in global benchmarks.

Domestic market Outlook: Wheat cash market is likely trade steady to slightly firm
