

Wheat Domestic Fundamentals:

India exported 1564.76 tonne wheat during week ended 8th May-2016 against 1095.49 tonne during week ending 2nd May-2016. Wheat has been exported at an average FoB of \$291.03 per tonne. Major buyers of the Indian wheat are UAE, Taiwan, UK, Nepal, Bahrain and Kuwait. There is no import last week. Sentiments in cash market remain firm in the short to medium term as supply side is lower than normal demand.

Agricultural Statistics Division, Directorate of Economics & Statistics (DES) has released Third Adv. Estimate for Rabi crop for 2015-16 on 9th May, 2016. Production target for wheat in Rabi had been set at 94.75 lakh tonne for 2015-16 crop year. Now in Third Adv. estimate wheat production estimate has been revised up from 93.82 lakh tonne to 94.04 MMT. Notably, India has produced 86.53 million tonne wheat in 2014-15. Market experts view it as surprise as production in Bihar and Uttar Pradesh is considerably lower this year. Arrivals too have not been up to the mark in Central India. Prices are ruling higher at this point of time. So market participants remain unconvinced over the higher production size.

All India average price decreased by 3.43 % from Rs 1777.04 to Rs 1716 per qtl. during last two-three days despite lower procurement, arrivals and active buying by private trades,. However, more decrease from current level is unlikely says market experts. There is a huge gap on production estimates between govt. and private trades.

This year private trades have brought 20 to 25 % more wheat from last year in anticipation of shortfall and it would limit offtake from OMSS in July and August. Higher offtake is now expected October onwards. If India receives higher than normal rainfall this year, it would help higher area coverage and ensure better production. There is a gossip in the market that farmers have retained more stock this year and they would prefer to release it in lean season. It would help to limit firmness in the lean season, especially in the last quarter. Besides, govt has ample stock to take care of any unexpected rise in cash market.

Agriwatch has revised its wheat production estimate up by 1.54 MMT from 89.28 MMT to 90.82 MMT for 2016-17 MY starting from April-2016. The new season (2016-17) started with 145.38 lakh tonne wheat as carry out. If we include private carryout (1 MMT), it comes to 155.38 lakh tonne. The new season may end up with 15.2 MMT as carry out including private carryout also. Production estimate for Bihar, Gujarat and Eastern Uttar Pradesh has been reduced by 20 to 30 percent due to thinner grain size this year. In other state crop is almost normal.

Govt. has reduced wheat procurement target for 2016-17 to 28MMT and it may be revised further down to 25MMT as cash market price is ruling higher from MSP. Govt agencies have procured 217.51 tonne wheat till 6th May-2016. Some difficulty may be faced in M.P. Uttar Pradesh and Rajasthan as private trade would remain active and would continue to offer higher price to farmers in anticipation of lower crop size this year.

International Market Update:

Russian wheat export prices rose slightly last week on high demand from traders needing to fulfil previously signed deals. Black Sea prices for Russian wheat with 12.5 percent protein content were at \$192.5 a tonne on a free-on-board (FOB) basis at the end of last week, up \$1.50 from a week earlier. FOB prices for maize (corn) rose \$1 to 183.5 per tonne. SovEcon, another farm consultancy, quoted export wheat prices at \$193 per tonne and maize prices at \$181 per tonne. Russia exported 30.7 million tonnes of grains, including 22.3 million tonnes of wheat, between July 1 and May 4.

IGC revised wheat production projection estimate up by 4MMT to 717 MMT in end April-16 for crop year 2016-17. According to IGC global wheat production for 2015-16 was registered at 732MMT. Projection for 2016-17 is quite lower from actual production of last year. The difference is around 15 MMT. Lower projection for wheat may lend support to global wheat market at current level and any major dip from current level is unlikely.

Domestic market Outlook: Wheat cash market is likely trade steady on the back of higher production estimate.
