

Wheat Domestic Fundamentals:

Cash wheat market is likely to stay steady to slightly firm in the short to medium term. Fear of import duty reduction is over now and imported volume would remain restricted to the south Indian millers. Demand for domestic wheat from south Indian millers is likely to continue and it may lend support to wheat market fundamentals. Offtake from central pool stock too would continue, especially from Punjab where maximum stock is accumulated.

India had entered into contract till May for importing around 1200000 tonnes of wheat in 2016. The last time India bought such large quantity was in 2006, when around six million tonnes was imported. Such large imports in 2006 led to an increase of about 50 percent in global prices. In 2016 traders and millers are expecting the same rally to reoccur in global prices but such an event is not possible now, as major producing countries except France have enough marketable surplus which cannot be consumed by India alone. Besides with continuation of import duty, import volume would remain restricted below 2.25 MMT. Furthermore it would not be enough to push global prices up by 10% at a stretch, unless such crop is completely washed away which is expected in October.

India mainly imports wheat from France and Australia but production in France has dropped to 28.47 million hectares this year down by around 30% compared to last year. Taking advantage of the situation Ukraine has increased its exports to India. In July and August, Ukraine has delivered 240000 metric tons of wheat.

All India average wheat price continued its descending trend and decreased by 1.37 percent to Rs 1796.12 per qtl. during the week ended 10th Sept-2016..Wheat average price was ruling at Rs 1668.14 per qtl in the first week of Sept-2015. All India average price is higher by 7.67 % in comparison to price (Rs 1668.14 per qtl.) registered in the first week of Sept, 2015. Overall trend in cash market is expected to remain steady to slightly weak as govt. may revise wheat import duty from 25% to 15 % in Sept.-2016.It would pressurize inner tone in the market. If duty is not revised, steady to firm sentiment may continue.

Pressure continues on wheat cash market as domestic players are awaiting decision on import duty. Market may continue to trade steady to weak until decision over duty gets clear. If duty is revised down cash market is likely to move down as higher volume of import may affect wheat demand from south India and it would turn inner tone in bear's favor. So all eyes are on decision on duty that will determine price direction of the market.

India imported around 74,000 tonne wheat from Australia and Ukraine last week till 4th Sept-2016 at an average CiF of \$228.98 per tonne. Around 10,000 tonne has been imported from Ukraine at an average CiF of \$193.21 per tonne and it landed at Tuticorin port. Mostly Australian wheat has landed at Tuticorin port at an average CiF of \$244.58 per tonne and it landed at Tuticorin port. One consignment of 10,000 T Australian wheat landed at Cochin sea at an average CiF of \$ 249.15 per tonne. More vessels are expected in Sept. Players are waiting for revision in duty and no fresh deal has been reported this week. Total import in current marketing year has crossed 3.48 lakh tonne .

Wheat stock in central pool is almost 25.28% lower than stock registered in Aug-2015. As on 1st August-2016 wheat stock in central pool was registered at 268.79 lakh tonne. It was 301.81 lakh tonne in July-2016. Major portion of wheat stock is available in north zone where 202 lakh tonne wheat was registered in stock. South zone has 54.18 lakh tonne wheat. North zone includes Haryana, Punjab and Rajasthan while south zone includes Gujarat, Maharashtra, M.P and Chhattisgarh.

International Market Update:

France has harvested one of its worst wheat crops on account of heavy rainfall in late May to mid June as well as low sunshine during the crop's growth period. This year France's area is up by 1.3% (5.23 million hectares) whereas production and yield are down by 30% (28.47 million tonnes) and 31% (5.45 tonnes per hectare) respectively compared to last year.

Wheat stockpiles in Canada have decreased sharply in comparison to last year. However, it has not declined as much as expected at this point of time. A report from Statistics Canada shows this. It has pegged wheat stock at 5.2 MMT by the end July-2016. It is down by 27 % from last year. However, it is higher by trade estimate of 4.29 MMT. The main reason behind higher stock is higher retention at farm level. Canada is a major wheat exporter.

Russia deputy agriculture minister Jambulat Khaturov in his latest statement has said that country would abolish export duty on wheat by July 2018. Russia had imposed export duty on wheat in Feb-2015 to stabilize grain price in local market. Under current duty effective from 1st October 2015 exporters have to pay amounts to 50 % of the customs value minus 6500 rubles per metric tonne with a condition that it would not be less than 10 rubles per metric tonnes.

IGC has revised wheat production projection up by 8MMT from 735 MMT to 743 MMT on 25th, Aug-2016 for crop year 2016-17. According to IGC global wheat production for 2016-17 may touch 743 MMT against 736 forecasts for 2015-16.

Outlook: Cash market is expected to trade steady to firm in the near term
