

Wheat Domestic Fundamentals:

The centre may revise down import duty from ten to zero percent in order to boost domestic supplies and keep the rising prices in check. Furthermore latest update by IMD for a warmer winter has increased concern for this year's wheat crop. Wheat stocks with FCI have fallen to a five year low which has reduced the sale of wheat in open market. Currently, wheat import duty is ten percent which was revised down from 25 percent in the month of September '16.

According to latest update, area sown until 02 December'16 is 173.93 lakh hectares compared to 152.26 lakh hectares in the previous Rabi season. Among major states the area is down in Chhattisgarh, Gujarat and Himachal Pradesh, whereas Madhya Pradesh, Maharashtra, Punjab and Uttar Pradesh have seen an increase in area compared to last year for the same date. The normal area is 304.05 lakh hectares. Area is expected to be higher this year as government has increased MSP of wheat which may motivate farmers to sow more area.

At import front situation seems to be turning in favor of south Indian millers after revision of import duty to 10%. Wheat from Ukraine is arrived at Chennai and Tuticorin port at \$195.23 per tonne and \$199.93 per tonne respectively. In October India imported 5.41 lakh tonne wheat at an average CiF of \$221.97 per tonne. Import is likely to continue as prices in domestic market rules higher. As import duty is slashed, import volume may exceed 2MMT in current MY. It would impact south Indian millers demand from central and north India. Off-take from central pool would decrease.

At export front prevailing market conditions are not in favor of Indian exporters due to huge price gap. The difference is over \$130 per tonne from Black Sea Region. Russia/Ukraine is offering wheat at \$181.5/183 per tonne on FoB basis while Indian FoB at Kandla port comes to \$318.12 per tonne. India exported 3350 tonne wheat in November at an average FoB of \$373.81 per tonne. Total export in current MY till October-2016 was registered around 29694 tonne from 1st April. For current MY till October average FoB comes to \$344.7 per tonne. There is no hope for any recovery at export front this year.

All India weekly average prices increased by 2.41 percent to Rs. 2177.08 per quintal during the week ended 08th December 2016. Wheat average price were ruling at Rs 2125.88 per quintal during 24-30th November 2016. As compared to prices in the week 01-08th December 2015, the prices are firm by 27.50 percent. Prices are expected to remain range bound to slightly weak in coming days.

Wheat WPI has increased slightly from 231.9 in September to 232.9 in October-2016. Monthly wheat inflation has increased by 0.43 percent in October-16 compared to September -16. As compared to October-15 wheat WPI has increased by around 6.3 percent.

International Market Update:

Australia is expecting a crop of around 31.5 million tonnes which will break its own record of 29.9 million tonnes set five years earlier. Australia is not only hoping to regain its market share lost in Asia but also challenge countries in the black sea region at a global level. Australia standard wheat with 9 percent protein was quoted at \$185 per tonne FoB this week. This quote is still higher by around \$6 per tonne compared to Russia and Ukraine.

GASC has purchased 240000 tonnes of Russian wheat through tender after abolishing its zero-tolerance policy towards ergot. Louis Dreyfus offered 60000 tonnes at FOB \$188.74/tonne, Olam offered 60000 tonnes at FOB of \$189.05/tonne, Alegrow offered 60000 tonnes at FOB \$189.46/tonne and Grainbow offered 60000 tonnes at FOB \$188.74/tonne.

According to latest update by International Grains Council, the production forecast has been increased by 1 MMT for crop year 2016-17. The production may touch 749 MMT against a forecast of 737 MMT for 2015-16. The difference is around 12 MMT. However trade projection has been revised down by 1MMT to 166 MMT which is still 2 MMT higher than actual of last year. Higher projection for wheat may pressurize global wheat at current level and any major recovery from current level is unlikely.

Outlook: Cash market is expected to trade steady to slightly weak in the near term
