

**Wheat Domestic Fundamentals:**

**According to latest update, area sown until 09 December'16 is 225.62 lakh hectares** compared to 202.29 lakh hectares in the previous Rabi season. Among major states the area is down in Chhattisgarh, Karnataka and Himachal Pradesh, whereas Madhya Pradesh, Maharashtra, Punjab and Uttar Pradesh have seen an increase in area compared to last year for the same date. The normal area is 304.05 lakh hectares. Area is expected to be higher this year as government has increased MSP of wheat which may motivate farmers to sow more area.

**As per latest update, India has removed import duty on wheat** in order to improve domestic supplies and keep the rising prices in check. Government revised import duty from 25 percent to 10 percent in the month of September. As import duty has been removed import volume may be around 3MMT in current marketing year. Furthermore latest update by IMD for a warmer winter has increased concern for this year's wheat crop. Wheat stocks with FCI have fallen to a five year low which has reduced the sale of wheat in open market.

**At import front situation seems to be turning in favor of south Indian millers** after revision of import duty to 10%. Wheat from Ukraine is arrived at Chennai and Tuticorin port at \$195.23 per tonne and \$199.93 per tonne respectively. In October India imported 5.41 lakh tonne wheat at an average CiF of \$221.97 per tonne. Import is likely to continue as prices in domestic market rules higher. As import duty is slashed, import volume may exceed 2MMT in current MY. It would impact south Indian millers demand from central and north India. Off-take from central pool would decrease.

**At export front prevailing market conditions are not in favor of Indian exporters** due to huge price gap. The difference is over \$130 per tonne from Black Sea Region. Russia/Ukraine is offering wheat at \$181.5/183 per tonne on FoB basis while Indian FoB at Kandla port comes to \$318.12 per tonne. India exported 3350 tonne wheat in November at an average FoB of \$373.81 per tonne. Total export in current MY till October-2016 was registered around 29694 tonne from 1st April. For current MY till October average FoB comes to \$344.7 per tonne. There is no hope for any recovery at export front this year.

**All India weekly average prices increased by 2.41 percent** to Rs. 2177.08 per quintal during the week ended 08th December 2016. Wheat average price were ruling at Rs 2125.88 per quintal during 24-30th November 2016. As compared to prices in the week 01-08th December 2015, the prices are firm by 27.50 percent. Prices are expected to remain range bound to slightly weak in coming days.

**Wheat WPI has increased slightly from 231.9 in September to 232.9 in October-2016.** Monthly wheat inflation has increased by 0.43 percent in October-16 compared to September -16. As compared to October-15 wheat WPI has increased by around 6.3 percent.

**International Market Update:**

**As per latest update, Japan's ministry of agriculture bought 123354 tonnes** of food quality wheat from United States and Canada. Around 67780 tonnes has been bought from United States with minimum protein content of 14 percent and 55574 tonnes has been bought from Canada with minimum protein content of 13.5 percent. The entire quantity from US will be loaded between January 16 and February 15, 2017.

**Ukrainian wheat shipments of around 400000 tonnes** which were booked for December delivery may be delayed as traders are giving priority to corn exports. Wheat shipment season is nearly over and corn shipments are at its peak. Therefore India may face low wheat supplies in upcoming days.

**Australia is expecting a crop of around 31.5 million tonnes** which will break its own record of 29.9 million tonnes set five years earlier. Australia is not only hoping to regain its market share lost in Asia but also challenge countries in the black sea region at a global level. Australia standard wheat with 9 percent protein was quoted at \$185 per tonne FoB this week. This quote is still higher by around \$6 per tonne compared to Russia and Ukraine.

**Outlook:** Cash market is expected to trade steady to slightly weak in the near term
