

**Wheat Domestic Fundamentals:**

**According to latest update, area sown until 16 December'16 is 256.19 lakh hectares** compared to 239.45 lakh hectares in the previous Rabi season. Among major states the area is down in Chhattisgarh, Karnataka and Himachal Pradesh, whereas Madhya Pradesh, Maharashtra, Punjab and Uttar Pradesh have seen an increase in area compared to last year for the same date. The normal area is 304.05 lakh hectares. Area is expected to be higher this year as government has increased MSP of wheat which may motivate farmers to sow more area. Sowing would continue till first week of January. Weather remains favorable for wheat crop.

**India has bought around 200000 tonnes of wheat from black sea region** in the last week after Indian government scrapped import duty on wheat. Of the total quantity 150000 tonnes of wheat is from Ukraine and the remaining quantity is from Russia. Ukraine has already emerged as a key exporter of wheat to India as it has already exported around 900 thousand tonnes of wheat in the past five months.

**Ukraine has become a key supplier of wheat to India** in the past five months. It has exported around 900 thousand tonnes of wheat to India. Another factor apart from lower prices that supported such large quantities to be exported to India was revision of duty by India from 25% to 10%. As import duty has been scrapped now it will increase the flow of imports from Ukraine further.

**All India weekly average prices increased by 3.01 percent** to Rs. 2242.69 per quintal during the week ended 15th December 2016. Wheat average price was ruling at Rs 2177.08 per quintal during 01-08th December 2016. As compared to prices in the week 09-15th December 2015, the prices are firm by 28.71 percent. Prices are expected to remain range bound to slightly weak in coming days.

**As per latest update, India has removed import duty on wheat** in order to improve domestic supplies and keep the rising prices in check. Government revised import duty from 25 percent to 10 percent in the month of September. As import duty has been removed import volume may be around 3MMT in current marketing year. Furthermore latest update by IMD for a warmer winter has increased concern for this year's wheat crop. Wheat stocks with FCI have fallen to a five year low which has reduced the sale of wheat in open market.

**At import front situation seems to be turning in favor of south Indian millers** after revision of import duty to Zero. Wheat from Ukraine is arrived at Chennai and Tuticorin port at \$195.23 per tonne and \$199.93 per tonne respectively. In October India imported 5.41 lakh tonne wheat at an average CiF of \$221.97 per tonne. Import is likely to continue as prices in domestic market rules higher. As import duty is slashed, import volume may exceed 2MMT in current MY. It would impact south Indian millers demand from central and north India. Off-take from central pool would decrease.

**International Market Update:**

**As per latest update, Argentina exports are expected to be highest since 2007.** In December 2007, Argentina exported 1.72 million tonnes of cereals. Now Argentina is expected to break this record. In December 2015, Argentina has exported around 40000 tonnes and around 295970 tonnes in the same month of 2014. After cuts in export tax Argentina recaptured its market share in Algeria, Kenya, Vietnam, Bangladesh and Thailand.

**As per latest update, USDA has increased its global wheat production forecast for 2016-17 up** by 6.54 MMT to 751.26 MMT. The forecast was revised up because of expectations of good crop in Australia. Consumption and ending stocks have also been revised up by 3.25 MMT and 2.91 MMT to 739.77 MMT and 252.14 MMT respectively.

**The Saudi Arabia grains organization has bought around 725000 tonnes** of hard wheat with a protein content of 12.5 percent for delivery between 1st February'17 to 10th April'17. Of the total quantity 430000 tonnes will arrive at Jeddah, 240000 tonnes will arrive at Dammam and the remaining 55000 tonnes at Jazan port.

**Outlook:** Cash market is expected to trade steady to slightly weak in the near term
