

### **Wheat Domestic Fundamentals:**

**Wheat cash market continued to trade weak after cheaper option for import.** Govt.'s move to erase duty to 0 % from 15 % has impacted cash wheat market and it declined by 7 to 8 % in last two weeks. At Delhi wheat price declined from Rs 2150 to Rs 2050 per qtl. Import flow may continue as parity of Rs 1000 per T still prevails. At the time the waiver was announced, the landed cost of import worked out to be cheaper by Rs 200 a qtl. Lured by the import benefit, flour mills contracted for around 500,000 tonnes of shipment from Ukraine. As of now 2 MMT wheat has been imported and 1MMT more is expected in next 2 to 3 months. Import still remains attractive.

**India has bought around 200000 tonnes of wheat from black sea region** in the last week after Indian government scrapped import duty on wheat. Of the total quantity 150000 tonnes of wheat is from Ukraine and the remaining quantity is from Russia. Ukraine has already emerged as a key exporter of wheat to Indian as it has already exported around 900 thousand tonnes of wheat in the past five months.

**Ukraine has become a key supplier of wheat to India** in the past five months. It has exported around 900 thousand tonnes of wheat to India. Another factor apart from lower prices that supported such large quantities to be exported to India was revision of duty by India from 25% to 10%. As import duty has been scrapped now it will increase the flow of imports from Ukraine further.

**All India weekly average prices increased by 3.01 percent** to Rs. 2242.69 per quintal during the week ended 15th December 2016. Wheat average price was ruling at Rs 2177.08 per quintal during 01-08th December 2016. As compared to prices in the week 09-15th December 2015, the prices are firm by 28.71 percent. Prices are expected to remain range bound to slightly weak in coming days.

**As per latest update, India has removed import duty on wheat** in order to improve domestic supplies and keep the rising prices in check. Government revised import duty from 25 percent to 10 percent in the month of September. As import duty has been removed import volume may be around 3MMT in current marketing year. Furthermore latest update by IMD for a warmer winter has increased concern for this year's wheat crop. Wheat stocks with FCI have fallen to a five year low which has reduced the sale of wheat in open market.

**At import front situation seems to be turning in favor of south Indian millers** after revision of import duty to Zero. Wheat from Ukraine is arrived at Chennai and Tuticorin port at \$195.23 per tonne and \$199.93 per tonne respectively. In October India imported 5.41 lakh tonne wheat at an average CiF of \$221.97 per tonne. Import is likely to continue as prices in domestic market rules higher. As import duty is slashed, import volume may exceed 2MMT in current MY. It would impact south Indian millers demand from central and north India. Off-take from central pool would decrease.

### **International Market Update:**

**Importers in the Philippines purchased about 25,000 tonnes of Australian-origin feed wheat.** The buyers had asked for quotations for milling wheat but bought feed wheat grades. Price was around \$196 a tonne c&f for April 2017 arrival. Besides, Egypt brought 3.6 lakh tonne milling grade wheat from Russia, Romania and Argentina for mid Jan-2017 delivery. It has been brought at the average price of USD 198/ MT C&F. The price at the previous tender equaled USD 202.5/MT C&F. Due to the cheaper FOB offers available from Argentina, Russian traders had to lower their FOB prices in average by \$2. Also there was observed \$2.5 decrease in Russian freight rates.

**Russian wheat export in MY 2016-17 from 1st July to 14 Dec has increased by 1.9 percent** to 143.17 lakh tonne YoY basis. However, wheat exports from this country has been lower than expected in the 2016-17 marketing year as farmers have been slow to let go of their stocks on the domestic market due to low prices. However, this year's projected exports are 3.46 million mt higher than last year's first half. Higher export is mainly attributed to higher export volume in non-traditional countries like Algeria, Tunisia and others.

**As per latest update, Argentina exports are expected to be highest since 2007.** In December 2007, Argentina exported 1.72 million tonnes of cereals. Now Argentina is expected to break this record. In December 2015, Argentina has exported around 40000 tonnes and around 295970 tonnes in the same month of 2014. After cuts in export tax Argentina recaptured its market share in Algeria, Kenya, Vietnam, Bangladesh and Thailand.

**The Saudi Arabia grains organization has bought around 725000 tonnes** of hard wheat with a protein content of 12.5 percent for delivery between 1st February'17 to 10th April'17. Of the total quantity 430000 tonnes will arrive at Jeddah, 240000 tonnes will arrive at Dammam and the remaining 55000 tonnes at Jazan port.

**Outlook:** Cash market is expected to trade steady to slightly weak in the near term
