

### Wheat Domestic Fundamentals:

**Pressure on cash wheat market may continue as recent rains in major** growing belts and decreasing temperature are considered to be favorable for standing crop and its better growth. Crop is in developmental stage and farmers are happy with short spell of rains. One –two spell of rains in Jan end and Feb would help in attaining better yield. Import flows continue and domestic demand remains restricted. All these developments would not allow wheat market to get firmer.

**After dip, cash market traded up. It is considered to be an adjustment** phase. Uptrend is unlikely to continue. Better production prospects, bearish tone in global market and eased supply side with higher import volume weighed on wheat market fundamental. Besides, reduced offtake by flour millers and continuous release from central pool stock would continue to pressurize cash wheat market in coming weeks. More dip is expected in coming weeks. If it rains this week, pressure would build up again. Weather remains favorable for wheat crop so far. Given the normal weather condition wheat production may touch 94 MMT once again. However, weather condition in Feb-Mar would remain crucial for the final size of the crop.

**Wheat area coverage is up by 7.71 % to 292.39 lakh ha till Dec-30<sup>th</sup>-2016.** It is up by 2.12 % from from normal till date. Normal area under wheat is 304.05 lakh ha. Higher area coverage has been reported from the States of Madhya Pradesh (6.04 lakh ha), Rajasthan (2.21 lakh ha), Maharashtra (2.09 lakh ha), Jharkhand (0.30 lakh ha), Uttarakhand (0.14 lakh ha) and Haryana (0.11 lakh ha). Less area coverage has been reported from the States of Gujarat (1.74 lakh ha), J&K (0.75 lakh ha), Himachal Pradesh (0.72 lakh ha), Karnataka (0.49 lakh ha), Bihar (0.36 lakh ha), Uttar Pradesh (0.24 lakh ha), Punjab (0.14 lakh ha), West Bengal (0.13 lakh ha), Assam (0.08 lakh ha) and Chhattisgarh (0.06 lakh ha).

**To ease supply side and check price in the open market, FCI has revised** its grain stocks norms for third quarter beginning in the month of October and January while rules for July and April have remained unchanged. Under the revised norms FCI needs to maintain wheat stocks of 19.5 million tonne (MT) and 13.8 MT on October 1 and January 1, respectively. Now it needs to maintain 1MMT less wheat. As on December 1, FCI had a wheat stock of 16.49 MT, against the buffer stocks norm of 13.8 MT required to be maintained on January 1. This implies that the corporation would be left with virtually no excess wheat stocks starting next year as it requires around 2.5 MT of grain monthly for Public Distribution System.

**Food corporation of India has been selling wheat at Rs 1640 per qtl. In ongoing MY,** FCI has sold 3.6 MT of wheat under OMSS to bulk buyers so far. In MY 16, it had sold 7.1 MT of wheat through OMSS while in the 2014-15, it had sold more than 4.2 mt of grain to bulk purchasers.

**India has bought around 200000 tonnes of wheat from black sea region** in the last week after Indian government scrapped import duty on wheat. Of the total quantity 150000 tonnes of wheat is from Ukraine and the remaining quantity is from Russia. Ukraine has already emerged as a key exporter of wheat to Indian as it has already exported around 900 thousand tonnes of wheat in the past five months.

**All India weekly average prices increased by 3.01 percent** to Rs. 2242.69 per quintal during the week ended 15th December 2016. Wheat average price was ruling at Rs 2177.08 per quintal during 01-08th December 2016. As compared to prices in the week 09-15th December 2015, the prices are firm by 28.71 percent. Prices are expected to remain range bound to slightly weak in coming days.

**At import front situation seems to be turning in favor of south Indian millers** after revision of import duty to Zero. Wheat from Ukraine is arrived at Chennai and Tuticorin port at \$195.23 per tonne and \$199.93 per tonne respectively. In October India imported 5.41 lakh tonne wheat at an average CiF of \$221.97 per tonne. Import is likely to continue as prices in domestic market rules higher. As import duty is slashed, import volume may exceed 2MMT in current MY. It would impact south Indian millers demand from central and north India. Off-take from central pool would decrease.

### International Market Update:

**Ukraine exported 1382.7KMT wheat in the month of Nov-2016. It is almost** same the quantity exported in Nov-2015. In the first 5 months of season-2016-17 wheat export from Ukraine increased by 7.7% YoY to 9618.3 KMT. India too emerged as a major buyer for Ukraine wheat. During this period India imported 10 % of total exported volume from Ukraine. Other major buyers were Thailand, Indonesia and South Korea .

**Importers in the Philippines purchased about 25,000 tonnes of Australian-origin feed** wheat. The buyers had asked for quotations for milling wheat but bought feed wheat grades .Price was around \$196 a tonne c&f for April 2017 arrival. Besides, Egypt brought 3.6 lakh tonne milling grade wheat from Russia, Romania and Argentina for mid Jan-2017 delivery. It has been brought at the average price of USD 198/ MT C&F.

**Russian wheat export in MY 2016-17 from 1st July to 14 Dec has increased by** 1.9 percent to 143.17 lakh tonne YoY basis. However, wheat exports from this country has been lower than expected in the 2016-17 marketing year as farmers have been slow to let go of their stocks on the domestic market due to low prices. However, this year's projected exports are 3.46 million mt higher than last year's first half.

**Outlook:** Cash market is expected to trade steady to range bound in the near term.
