

Wheat Domestic Fundamentals:

As per latest update, FCI has sold around 88 Thousand tonnes of wheat in the first week of February. In January FCI has sold around 3.41 lakh tonnes and 4.25 lakh tonnes in December. For the year 2016-17, FCI has sold around 41.34 lakh tonnes of wheat until first week of February. Of this total quantity around 35.25 lakh tonnes has been purchased by private trade and the remaining quantity by state governments.

All India weekly average prices decreased by 8.11 percent to Rs. 1961.4 per quintal during the week ended 08th February 2017. Wheat average price were ruling at Rs 2134.53 per quintal during 24-31 January 2017. As compared to prices in the week 01-08 February 2016, the prices are firm by 12.44 percent. Prices are expected to remain range bound to slightly weak in coming days.

According to latest update, area sown until 03 February'17 is 317.81 lakh hectares compared to 297.25 lakh hectares in the previous Rabi season. Among various states the area is down in Jammu & Kashmir and Karnataka, whereas Punjab, Haryana and Uttar Pradesh have seen an increase in area compared to last year for the same date. The normal area is 304.05 lakh hectares. Area is expected to be higher this year as government has increased MSP of wheat which has motivated farmers to sow more area.

Wheat WPI has increased slightly from 245 in November to 251.7 in December-2016. Monthly wheat inflation has increased by 2.73 percent in December-16 compared to November-16. As compared to December-15 wheat WPI has increased by around 12.82 percent.

As per latest update, India is expected to receive around 1MMT of wheat in January'17. This will include delayed shipments from last year as well as shipments that were booked for this month only. This may lead to congestion at Indian ports. Around 700,000 tonnes is expected from Ukraine and the remaining from Australia for the month. Furthermore Indian crop has entered crucial stages and any further deals will depend on how the crop shapes up. As of now, not many new deals are being signed.

To ease supply side and check price in the open market, FCI has revised its grain stocks norms for third quarter beginning in the month of October and January while rules for July and April have remained unchanged. Under the revised norms FCI needs to maintain wheat stocks of 19.5 million tonne (MT) and 12.8 MT on October 1 and January 1, respectively. Now it needs to maintain 1MMT less wheat. As on December 1, FCI had a wheat stock of 16.49 MT, against the buffer stocks norm of 13.8 MT required to be maintained on January 1. This implies that the corporation would be left with virtually no excess wheat stocks starting next year as it requires around 2.5 MT of grain monthly for Public Distribution System.

At import front situation seems to be turning in favor of south Indian millers after revision of import duty to Zero. Wheat from Ukraine is arrived at Chennai and Tuticorin port at \$195.23 per tonne and \$199.93 per tonne respectively. In October India imported 5.41 lakh tonne wheat at an average CiF of \$221.97 per tonne. Import is likely to continue as prices in domestic market rules higher. As import duty is slashed, import volume may exceed 2MMT in current MY. It would impact south Indian millers demand from central and north India. Off-take from central pool would decrease.

International Market Update:

As per latest update, Japan's ministry of agriculture bought 111522 MMT of food quality wheat from United States, Australia and Canada. Around 65060 MMT has been bought from United States with minimum protein content of 14 percent to be loaded between March 21-April 20, 24347 MMT has been bought from Canada with minimum protein content of 13.5 percent to be loaded between April 21- May 20 and 22115 MMT from Australia to be loaded between April 1-April 30.

As per latest update, Ukraine has exported around 11.5 MMT of wheat in first half of MY 2016-17 higher by around 1 MMT compared to last year for the same period. India remained the top buyer of Ukrainian wheat as it purchased around 1.8 MMT of wheat during the above period. However, Ukraine exported around 18% less wheat to world's largest importer i.e. Egypt in the first half of 2016/17.

Bangladesh will import 200000 tonnes of Russian wheat at \$245 a tonne CIF. The first cargo of 55000 tonnes is likely to arrive around February 08th. Last year Bangladesh rejected three cargoes of Russian wheat totaling 150000 tonnes over quality concerns.

As per latest update, USDA has kept production estimates for Australia, Russia and Argentina at 33 MMT, 72.5 MMT and 15 MMT higher by 34.7%, 18.8% and 32.7% respectively compared to last year. Russia's winter grain was not damaged by recent cold spell and it has exported around 17.7 MMT between July 1'16- Feb 1'17. Furthermore, France has kept its area sown for winter soft wheat unchanged at 5.2 million hectares.

Outlook: Cash market is expected to trade steady to weak in the near term.
