As per forecast of meteorological department, weather will become more conducive for crop in coming days.

Australia's 2017 wheat crop is likely to reach 24 MMT compared to 35 MMT in 2016. The production will fall due to lower wheat prices as well as drier and warmer autumn. Furthermore exports are forecasted at 18 MMT down by around 20 percent due to lower production, strengthening Australian dollar and possibility of delays in shipping.

Milling wheat prices kept on falling in Russia due to strengthening of Rouble and sufficient market supply. Furthermore, millers have enough stocks to keep prices down. Export prices for Russian milling wheat decreased by \$1-\$2 per tonne on weekly basis. Russian wheat with a protein content of 12.5% and 11.5% for April- May delivery settled at \$187-189/tonne FoB and \$182-184/tonne FoB respectively.
