

Wheat Domestic Fundamentals:

According to State Agriculture Minister of UP SP Sahi The state has produced record 332 lakh tonne wheat this year. Procurement continues and till 20th May-2017 procured quantity has crossed 20 lakh tonne against revised target of 80 lakh tonne. The main reason for higher production is mainly attributed to congenial weather from sowing to harvesting season and higher area coverage.

Government agencies have started procurement since 15th March'17. Until 19th May'17 government has procured around 285.03 lakh tonnes of wheat. Of the total quantity procured, around 63.53 lakh tonnes has been procured from Madhya Pradesh, 74.11 lakh tonnes from Haryana, 116.17 lakh tonnes from Punjab and 20.89 lakh tonnes from Uttar Pradesh. In Rabi marketing season 2017-18 government has set procurement target of 330 LMT. Government has achieved 86.37% of its procurement target. Last year government was able to procure only 229 lakh tonnes due to lower production.

Government stock as on 01st May'17 stood at 277.05 lakh tonnes compared to 314.45 lakh tonnes at the same date last year. Due to two consecutive bad crops government was not able to procure as per their target and had to sell more in OMSS to keep the prices under control which led to fall in stocks. However this year production is better and procurement has crossed 283 lakh tonnes as on 18th May and government will sell less through OMSS which may lead to some recovery in central pool stock.

As per market sources, India's wheat imports have slowed down due to good domestic crop. Furthermore around 1.8 million tonnes of imported wheat from Australia and Black sea region is lying unsold in port silos. For marketing year 2017-18 demand for imported wheat is likely to be low and India may import around 2-3 million tonnes.

Government is likely to sell around 40 lakh tonnes of wheat in MY 2017-18 compared to 46 lakh tonnes in MY 2016-17. Due to low production in last two years, wheat stock in central pool dwindled to five year lows. As of now government is procuring intensively to replenish its stocks. Furthermore millers and traders are also not having any trouble in procuring this year due to ample availability.

Monsoon is likely to arrive early this year and is expected to hit south Kerala coast on 30th May'17, early by around two days. Furthermore India may receive higher monsoon rainfall this year compared to previous forecast as probability of El Nino has been reduced. Monsoon rains which arrive in Andaman & Nicobar around May 20th have already reached on 14th May, around six days ahead of schedule.

As per latest update, until 12th May around 73.62 lakh tonnes of wheat have arrived in Haryana. Traders and five government agencies have purchased 6854 tonnes and 73.55 lakh tonnes of wheat respectively. Of the total quantity procured by government agencies around 18.21 lakh tonnes has been procured by food, civil supplies and consumer affairs department, 26.59 lakh tonnes by HAFED, 8.59 lakh tonnes by FCI, 6.75 lakh tonnes by Haryana Agro Industries corporation and 13.40 lakh tonnes by Haryana warehousing corporation. Sirsa is the leading district with more than 10.72 lakh metric tonnes of arrival.

As per third advance estimate for 2016-17 wheat production is likely to be around 97.4 MMT which is higher compared to second advance estimate of 96.6 MMT issued in February 2017. Grain quality is better this year compared to last year and there are no issues relating to higher moisture and pest. This year overall acreage is higher by around 4.5% over normal acreage of 304.05 lakh hectares.

International Market Update:

GASC has purchased 295000 tonnes of wheat through tender after abolishing its zero-tolerance policy towards ergot. Of the total quantity 60000 tonnes is of Russian origin, 60000 tonnes is of Ukrainian origin, 60000 tonnes is of Romanian origin and 115000 tonnes is of US origin. Cereacom bought Romanian wheat at FoB \$197.49 per tonne, Midgulf bought Russian wheat at FoB \$198.00 per tonne, Louis Dreyfus bought US wheat at FoB \$185.40 per tonne, Ameropa bought US wheat at \$186.75 per tonne and Louis Dreyfus bought Ukrainian wheat at FoB \$197.05 per tonne.

As per latest update, Japan's ministry of agriculture bought 115491 MMT of food quality wheat from United States and Canada. Around 79572 MMT has been bought from United States to be loaded between June 21-July 20 and 35919 MMT of western red spring wheat has been bought from Canada with minimum protein content of 13.5 percent to be loaded between July 21- Aug 20.

Russian wheat prices remained stable as rouble became strong against dollar and Turkey restored purchases of upcoming crop in Russia. Russian wheat with protein content of 12.5% was traded at \$182.50 per tonne this week, unchanged from a week earlier. Russia exported 24.4 MMT of wheat from 01st July'16 to 10th May'17 up by around 1% compared to year before during the same time period.

Outlook: Cash market is expected to trade steady to slightly weak in the near term.
