

Wheat Domestic Fundamentals:

All India average monthly prices for wheat decreased by 0.20 percent from Rs 1810.17 (in April) to Rs 1806.55 per qtl in May-2017. Arrivals from central and north India kept the domestic market under pressure. Average price (May) is higher by 6.40 percent compared to price (Rs 1697.89 per qtl.) registered in May-2016. Demand from south Indian millers is weak and government has no intention of increasing import duty as of now. Prices are likely to move from range bound to weak.

Government agencies have started procurement since 15th March'17. Until 31st May'17 government has procured around 297.71 lakh tonnes of wheat. Of the total quantity procured, around 67.24 lakh tonnes has been procured from Madhya Pradesh, 74.11 lakh tonnes from Haryana, 116.88 lakh tonnes from Punjab and 28 lakh tonnes from Uttar Pradesh. In Rabi marketing season 2017-18 government has set procurement target of 330 LMT. Government has achieved 90.2% of its procurement target. Last year government was able to procure only 229 lakh tonnes due to lower production.

Normal monsoon rains are expected now as adverse El Niño weather condition has weakened. After its likely onset on May 29-30, the southwest monsoon June may receive 164 mm, July-289 mm and Aug-269 mm rains. Chhattisgarh and Vidarbha were expected to get a good amount of pre-monsoon showers during June, where the usual onset date is late June or early July.

Government stock as on 01st May'17 stood at 277.05 lakh tonnes compared to 314.45 lakh tonnes at the same date last year. Due to two consecutive bad crops government was not able to procure as per their target and had to sell more in OMSS to keep the prices under control which led to fall in stocks. However this year production is better and procurement has crossed 283 lakh tonnes as on 18th May and government will sell less through OMSS which may lead to some recovery in central pool stock.

As per market sources, India's wheat imports have slowed down due to good domestic crop. Furthermore around 1.8 million tonnes of imported wheat from Australia and Black sea region is lying unsold in port silos. For marketing year 2017-18 demand for imported wheat is likely to be low and India may import around 2-3 million tonnes.

As per third advance estimate for 2016-17 wheat production is likely to be around 97.4 MMT which is higher compared to second advance estimate of 96.6 MMT issued in February 2017. Grain quality is better this year compared to last year and there are no issues relating to higher moisture and pest. This year overall acreage is higher by around 4.5% over normal acreage of 304.05 lakh hectares.

According to latest update, area sown until 03 February'17 is 317.81 lakh hectares compared to 297.25 lakh hectares in the previous Rabi season. Among various states the area is down in Jammu & Kashmir and Karnataka, whereas Punjab, Haryana and Uttar Pradesh have seen an increase in area compared to last year for the same date. The normal area is 304.05 lakh hectares. Area is expected to be higher this year as government has increased MSP of wheat which has motivated farmers to sow more area.

International Market Update:

GASC has purchased 180000 tonnes of wheat through tender after abolishing its zero-tolerance policy towards ergot. Of the total quantity 120000 tonnes is of Russian origin and 60000 tonnes is of Romanian origin. ADM bought 60000 tonnes of Romanian wheat at FoB \$201.56 per tonne and MidGulf bought 120000 tonnes of Russian wheat at FoB \$203.14 per tonne.

As per latest update, Egypt has procured around 3.6 million tonnes of wheat since the beginning of its harvesting season from mid-April. Egypt's supply minister expects to procure between 3.5 to 4.0 million tonnes from local farmers until July. The ministry has decided to provide a premium of 15 Egyptian pounds per tonne for wheat stored and transported in jute bags and 10 Egyptian pounds per tonne for wheat stored in silos located far from production areas with over 50 percent empty storage capacity.

As per Buenos Aires grains exchange wheat crop is likely to hit a new record of 17.5 million tonnes in 2017-18 compared to 16.3 million tonnes in 2016-17. The increase in production of upcoming crop is mainly attributed to better crop technology. The only concern is regarding excessive moisture levels which are making it hard to prepare the land for planting.

Russian export prices moved up due to strong rouble against dollar and concerns over cold and rainy weather in May which may lead to lower yields. Russian wheat with 12.5 percent protein was quoted at FoB \$186.5 per tonne, up by around \$1 per tonne compared to last week. Russia exported 25.2 million tonnes of wheat between July 1 and May 24 higher by 1.3 percent compared to last year.

Outlook: Cash market is expected to trade steady to slightly weak in the near term.
