

Wheat Domestic Fundamentals:

As per market sources, Ukraine is offering wheat with 10.5 percent protein for CFR \$218-220 per tonne at Tuticorin port for July-August shipment. However due to good production, unsold stock at port silos and lower domestic prices buyers are not finding these prices attractive.

As per latest update, wheat stock in central pool as on 1st June'17 stood at 33.44 MMT up by 12.82% compared to last month. This quantity is higher by around 8.02% compared to last year for the same month. For the year 2017-18, FCI has decided to sell around 40 lakh tonnes of wheat. As per third advance estimate for 2016-17 wheat production is likely to be around 97.4 MMT which is higher compared to second advance estimate of 96.6 MMT issued in February 2017.

FCI will sell 16000 tonnes of wheat through e-auction in Delhi tomorrow at various depots. The reserve price has been fixed at Rs 1790 per quintal plus freight and other taxes/charges. Government is likely to sell around 40 lakh tonnes of wheat in MY 2017-18 compared to 46 lakh tonnes in MY 2016-17.

Government agencies have started procurement since 15th March'17. Until 13th June'17 government has procured around 304.25 lakh tonnes of wheat. Of the total quantity procured, around 67.24 lakh tonnes has been procured from Madhya Pradesh, 74.11 lakh tonnes from Haryana, 117.05 lakh tonnes from Punjab, 33.57 lakh tonnes from Uttar Pradesh and 12.12 lakh tonnes from Rajasthan. In Rabi marketing season 2017-18 government has set procurement target of 330 LMT. Government has achieved 92.19% of its procurement target. Last year government was able to procure only 229 lakh tonnes due to lower production.

Government stock as on 01st May'17 stood at 277.05 lakh tonnes compared to 314.45 lakh tonnes at the same date last year. Due to two consecutive bad crops government was not able to procure as per their target and had to sell more in OMSS to keep the prices under control which led to fall in stocks. However this year production is better and procurement has crossed 283 lakh tonnes as on 18th May and government will sell less through OMSS which may lead to some recovery in central pool stock.

As per third advance estimate for 2016-17 wheat production is likely to be around 97.4 MMT which is higher compared to second advance estimate of 96.6 MMT issued in February 2017. Grain quality is better this year compared to last year and there are no issues relating to higher moisture and pest. This year overall acreage is higher by around 4.5% over normal acreage of 304.05 lakh hectares.

According to latest update, area sown until 03 February'17 is 317.81 lakh hectares compared to 297.25 lakh hectares in the previous Rabi season. Among various states the area is down in Jammu & Kashmir and Karnataka, whereas Punjab, Haryana and Uttar Pradesh have seen an increase in area compared to last year for the same date. The normal area is 304.05 lakh hectares. Area is expected to be higher this year as government has increased MSP of wheat which has motivated farmers to sow more area.

International Market Update:

Russian milling wheat export prices for old crop with 12.5% protein content at Novorossiysk port increased by \$ 1 per tonne reaching FoB \$189-192 per tonne for June delivery. This was mainly due to bullish trend in the world and decreased supply of food grains from Russia. Furthermore prices for the new crop also increased supported by concerns over the new crop due to unfavorable weather conditions.

As per latest update, Japan's ministry of agriculture bought 162286 MMT of food quality wheat from United States, Australia and Canada. Around 98536 MMT with minimum protein content of 14 percent has been bought from United States to be loaded between July 21 - August 20, 28620 MMT has been bought from Canada with minimum protein content of 13.5 percent to be loaded between August 21- September 20 and 35130 MMT of standard white has been bought from west Australia to be loaded between August 1-August 31.

The Rosario grain exchange has increased Argentina's winter wheat area by around 8 percent to 5.6 million hectares from 5.2 million hectares. Wheat crop is likely to hit a new record of 17.5 million tonnes in 2017-18 compared to 16.3 million tonnes in 2016-17. The increase in production of upcoming crop is mainly attributed to better crop technology. The only concern is regarding excessive moisture levels which are making it hard to prepare the land for planting.

Australia has given its production forecast for 2017-18 at 24.19 MMT compared to last year's record crop of 35.1 MMT. The area has been decreased by around 1.2 percent to 12689 thousand hectares compared to 2016-17. Last year exceptional yields have led to a record crop, however this year yields have returned to normal levels.

Outlook: Cash market is expected to trade steady to slightly weak in the near term.
