

Wheat Domestic Fundamentals:

All India average monthly prices for wheat decreased by 4.89 percent from Rs 1798.19 (in May) to Rs 1710.2 per qtl in June-2017. Average price (June) is lower by 3.52 percent compared to price (Rs 1772.54 per qtl.) registered in June-2016. Demand from south Indian millers is weak and government has no intention of increasing import duty as of now. With the beginning of festive season prices may get some support and are likely to move from steady to firm.

FCI will sell a total quantity 483000 tonnes of wheat in different states through e-auction on 06th July at a reserve price of Rs 1790 per quintal. Of the total quantity in OMSS, highest quantity of 244000 tonnes is offered in Maharashtra followed by 50000 tonnes in West Bengal, 45000 tonnes in Madhya Pradesh, 32000 tonnes in Gujarat, 20400 tonnes in Karnataka, 20000 tonnes in Rajasthan, 16000 tonnes in Delhi, 15200 tonnes in Kerela, 13500 tonnes in Tamil Nadu, 15000 tonnes in Assam, 4400 tonnes in Chhattisgarh, 5000 tonnes in J&k, 1000 tonnes in Pondicherry and 1500 tonnes in Goa.

India has extended exemption for crop fumigation by six month to 30th December 2017. Prior to this, India has stated that after 30th June 2017 the country would accept cargoes that are fumigated with methyl bromide at the port of origin. However this extension of six months comes with a cost as cargoes need to be fumigated at port of destination in India at five times the normal cost of fumigation. This will add up to \$ 11.18 per tonne for container shipment. Methyl bromide has been banned or restricted in many countries due to its unfriendly atmospheric properties.

Government agencies have started procurement since 15th March'17. Until 30th June'17 government has procured around 307.98 lakh tonnes of wheat. Of the total quantity procured, around 67.24 lakh tonnes has been procured from Madhya Pradesh, 74.11 lakh tonnes from Haryana, 117.05 lakh tonnes from Punjab, 36.99 lakh tonnes from Uttar Pradesh, 12.43 lakh tonnes from Rajasthan, 0.02 lakh tonnes from Uttarakhand, 0.08 lakh tonnes from Chandigarh and 0.06 lakh tonnes from Gujarat. In Rabi marketing season 2017-18 government has set procurement target of 330 LMT. Last year government was able to procure only 229 lakh tonnes due to lower production.

As per market sources, Ukraine is offering 2nd class wheat for CNF \$240 per tonne and 3rd class wheat for CNF \$235 per tonne at Mundra port. Furthermore high quality Ukrainian wheat flour with protein content of 10.5% is being offered at FoB \$245 per tonne at Odessa port. However due to good production, unsold stock at port silos and lower domestic prices buyers are not finding these prices attractive.

As per third advance estimate for 2016-17 wheat production is likely to be around 97.4 MMT which is higher compared to second advance estimate of 96.6 MMT issued in February 2017. Grain quality is better this year compared to last year and there are no issues relating to higher moisture and pest. This year overall acreage is higher by around 4.5% over normal acreage of 304.05 lakh hectares.

According to latest update, area sown until 03 February'17 is 317.81 lakh hectares compared to 297.25 lakh hectares in the previous Rabi season. Among various states the area is down in Jammu & Kashmir and Karnataka, whereas Punjab, Haryana and Uttar Pradesh have seen an increase in area compared to last year for the same date. The normal area is 304.05 lakh hectares. Area is expected to be higher this year as government has increased MSP of wheat which has motivated farmers to sow more area.

International Market Update:

As per latest update, china has sold 21223 tonnes of wheat for average price of 2432 yuan (\$357.76) per tonne at an auction of state reserves on Tuesday. The quantity sold represents around 0.70 percent of 3006652 tonnes of wheat available at auction.

IGC has decreased its projection for wheat to 735 MMT as on 29th June-2017 for 2017-18. According to forecast by IGC for 2016-17 global wheat production was around 754 MMT against 738 MMT for 2015-16. The difference is around 19 MMT from previous year's production forecast. Trade projection has been increased by 1 MMT to 170 MMT. Consumption has also been reduced by 3 MMT to 735 MMT.

Wheat prices in Russia have increased for the sixth week due to fear of crop loss in some of major producers and delayed local harvesting. Black sea wheat prices for new crop increased by \$0.5 per tonne to \$185.5 per tonne compared to last week. Furthermore good international demand is also supporting wheat prices in the black sea region. Russia has exported 26.6 million tonnes of wheat from July 01 to June 21.

As per latest update, wheat production in Ukraine is likely to be around 3 million tonnes to 23.1 million tonnes compared to last year due to unfavorable weather conditions. Overall grain harvest is likely to fall by around 10-11 percent to 59 million tonnes.

Outlook: Cash market is expected to trade steady to slightly weak in the near term.
