

### Wheat Domestic Fundamentals:

**As per latest update, traders in India have signed deals in the last few weeks to buy around 300000 tonnes of Ukrainian wheat with a protein content of 11.5% for September-October delivery.** Importers have paid \$210-217 per tonne cost and freight. More deals like these can be signed in the near future but as of now things have slowed down. India is likely to import 2-3 million tonnes of wheat in 2017-18.

**Government has offered 1104050 tonnes of wheat in OMSS for the month of June out of which only 115000 tonnes was sold.** In the month of July only 32850 tonnes was sold against a total quantity of 3561562 tonnes offered in the first three tenders. Off take is low this year due to ample availability in the market.

**All India average monthly prices for wheat increased by 3.89 percent from Rs 1715.75 (in June) to Rs 1782.49 per qtl in July-2017.** Average price (July) is lower by 0.03 percent compared to price (Rs 1782.99 per qtl.) registered in July-2016. Demand from south Indian millers is weak and government has no intention of increasing import duty as of now. With the beginning of festive season prices may get some support and are likely to move from steady to firm.

**As per IMD, since the beginning of south-west monsoon the rains have been well distributed all over India except few areas in the south.** The cumulative rainfall until Sunday in the country has been around 102 percent of the LPA and it is expected to be 99% of LPA in August which has 29 percent share in the overall monsoon rains. Until 28th July around 75 percent of Kharif sowing is done and because of normal rainfall this year better crop can be expected under normal conditions.

**As per latest update, India has exported 41.15 thousand tonnes of wheat in the month of May'17 compared to 31.07 thousand tonnes in previous month.** On import front India has imported 33 thousand tonnes of wheat in the month of May'17 compared to 185.17 thousand tonnes in the previous month. India is likely to import 3-4 million tonnes of wheat whereas exports are likely to be low as prices in India are ruling at higher side compared to other countries.

**As per third advance estimate for 2016-17 wheat production is likely to be around 97.4 MMT** which is higher compared to second advance estimate of 96.6 MMT issued in February 2017. Grain quality is better this year compared to last year and there are no issues relating to higher moisture and pest. This year overall acreage is higher by around 4.5% over normal acreage of 304.05 lakh hectares.

**According to latest update, area sown until 03 February'17 is 317.81 lakh hectares** compared to 297.25 lakh hectares in the previous Rabi season. Among various states the area is down in Jammu & Kashmir and Karnataka, whereas Punjab, Haryana and Uttar Pradesh have seen an increase in area compared to last year for the same date. The normal area is 304.05 lakh hectares. Area is expected to be higher this year as government has increased MSP of wheat which has motivated farmers to sow more area.

### International Market Update:

**France has harvested around 91 percent of its soft wheat crop until 31st July** compared to 85 percent a week ago. FranceAgriMer has estimated that median date for soft wheat harvest is still 11 days earlier than the average of past five years.

**As per latest update, Japan's ministry of agriculture bought 132925 MMT of food quality wheat from United States, Australia and Canada.** Around 50080 MMT with minimum protein content of 14 percent has been bought from United States to be loaded between September 21 - October 20, 49665 MMT has been bought from Canada with minimum protein content of 13.5 percent to be loaded between September 21 - October 20 and 33180 MMT of standard white has been bought from west Australia to be loaded between October 1-October 31.

**As on 28th July Russia has harvested 31.7 million tonnes of wheat compared to 33.0 million tonnes a year ago for the same date.** Around 7.2 million hectares of area has been harvested with an average yield of 4.44 tonnes per hectare compared to 8.1 million hectares with an average yield of 4.09 tonnes per hectare a year ago for same date.

**As per latest update by USDA around 31% of spring wheat** is in good or excellent condition compared to 68% a year ago. Further around 88% of winter wheat has been harvested compared to 84% a week ago.

**Wheat prices in Russia have shown upward movement in the last two weeks mainly due to increased demand from Egypt and delay in harvesting.** Wheat with 12.5% protein content was offered for \$193-196 per tonne FoB at Novorossiysk port compared to \$192-194 a week ago for the same port.

**Outlook:** Cash market is expected to trade steady to firm in the near term.
