Northwest and East & Northeast India are the only regions to receive more than normal rainfall. In the week (10th – 16th August) India has received rainfall below LPA by 16% and the worst hit region was central India which received rainfall below LPA by 63%. Furthermore a low pressure is developing in the Bay of Bengal which is likely to bring in central India which has seen a weak monsoon in last week.

As per fourth advance estimate for 2016-17 wheat production is likely to be around 98.8 MMT which is higher compared to third advance estimate of 97.4 MMT. The total food grain production has been pegged at 275.68 MMT compared to 251.57 MMT in final estimate of 2015-16.

India has received 518.3 mm of actual rainfall against 536.6 mm of normal rainfall since the beginning of monsoon season until 09th August. Northwest India is the only region to receive more than normal rainfall. During 17th to 23rd August rainfall activity is likely to be above normal over south peninsular India and adjoining central India. India is likely to import 3-4 million tonnes of wheat in 2017-18 despite good production this year as wheat is available at lower prices in the international market. Traders in India have signed deals for import of 3 lakh tonnes of Ukrainian wheat recently and have imported 1.4 lakh tonnes from Australia in the month of June. More deals like these can be signed in near future. Furthermore analyst are expecting record crop in Russia at around 77 MMT, which will keep Russia's export quotes at a lower level. The only fear importers are facing is an increase in import duty or abrupt change in phytosanitary measures.

As per latest update, wheat stock in central pool as on 1st August'17 stood at 300.59 lakh tonnes down by 6.87% compared to last month. This quantity is higher by around 11.83% compared to last year for the same month. For the month of July off take from central pool was around 22.16 lakh tonnes compared to 33.02 lakh tonnes for July '2016 and 19.95 lakh tonnes for July'2015. Off take is likely to increase in the coming months due to seasonal demand. FCI is currently selling wheat through E-Auction at a reserve price of Rs. 1790 per quintal.

According to latest update, area sown until 03 February'17 is 317.81 lakh hectares compared to 297.25 lakh hectares in the previous Rabi season. Among various states the area is down in Jammu & Kashmir and Karnataka, whereas Punjab, Haryana and Uttar Pradesh have seen an increase in area compared to last year for the same date. The normal area is 304.05 lakh hectares. Area is expected to be higher this year as government has increased MSP of wheat which has motivated farmers to sow more area.
