

Wheat Domestic Fundamentals:

India is likely to import 800000 tonnes of wheat in september and october from blacksea region at \$200-210 per tonne cost and freight after taking into account 10% of duty. According to traders there is not much price advantage, millers are buying to ensure smooth supplies in November and December. The only fear importers are facing is an increase in import duty or abrupt change in phytosanitary measures.

Import quotes for wheat from different origins to Tuticorin port has decreased compared to last week. As of now Tuticorin port price for APW is Rs 1830 per quintal, ASW is Rs 1760 per quintal and Ukrainian wheat at Rs 1660 per quintal. India is likely to import 3-4 million tonnes of wheat in 2017-18. Government may increase import duty from 10% in order to curb imports and provide support to domestic prices.

All India average monthly prices for wheat increased by 0.67 percent from Rs 1766.32 (in July) to Rs 1778.12 per qtl in August-2017. Average price (August) is lower by 0.46 percent compared to price (Rs 1786.42 per qtl.) registered in August-2016. Demand from south Indian millers is weak and government may increase import duty in order to curb imports and provide support to domestic prices. With the beginning of festive season prices may get some support and are likely to move from steady to firm.

FCI has offered a total of 11808752 tonnes of wheat through E-Auction since June until fifth tender in August. Sales through E-Auction of wheat are at lower side this year due to high domestic production and imports. In the month of June 115000 tonnes was sold against offered quantity of 1104050 tonnes, 34400 tonnes was sold in July against offered quantity of 4934602 tonnes and 43550 tonnes has been sold in five tenders of August against offered quantity of 5770100.

At export front prevailing market conditions are not in favour of Indian exporters due to huge price gap. The difference is around \$105-107 per tonne from Black Sea Region. Russia/Ukraine is offering wheat at \$169.00/171.50 per tonne on FoB basis while Indian FoB at Kandla port comes to \$277.30 per tonne. India exported 10.54 thousand tonne wheat in June. Total export in MY 2016-17 was registered around 96.27 thousand tonne from 1st April'16. There is no hope for recovery at export front this year.

As per fourth advance estimate for 2016-17 wheat production is likely to be around 98.8 MMT which is higher compared to third advance estimate of 97.4 MMT. The total food grain production has been pegged at 275.68 MMT compared to 251.57 MMT in final estimate of 2015-16.

According to latest update, area sown until 03 February'17 is 317.81 lakh hectares compared to 297.25 lakh hectares in the previous Rabi season. Among various states the area is down in Jammu & Kashmir and Karnataka, whereas Punjab, Haryana and Uttar Pradesh have seen an increase in area compared to last year for the same date. The normal area is 304.05 lakh hectares. Area is expected to be higher this year as government has increased MSP of wheat which has motivated farmers to sow more area.

International Market Update:

Russian milling wheat prices with 12.5% protein content increased by around \$3 per tonne compared to last week. The rise in prices was due to strong rouble. Russia is expected to produce 80-82 MMT of wheat this year compared to 72 MMT last year. As of now Russian milling wheat with 12.5% protein content at Novorossiysk port is being quoted at FoB \$181-185/tonne whereas milling wheat with 11.5% protein content is being quoted at FoB \$169-174/tonne.

Australia's quotes for APW have increased to \$230/T highest in last two weeks. Dry weather accompanied with firm Australian dollar has led to an increase of \$3.50/T in last two weeks. Production is likely to be around 22 MMT compared to last year's exceptional crop of 35 MMT.

As on 01st September Russia has harvested 67.8 million tonnes of wheat compared to 63.8 million tonnes a year ago for the same date. Around 17.7 million hectares of area has been harvested with an average yield of 3.84 tonnes per hectare compared to 20.1 million hectares with an average yield of 3.17 tonnes per hectare a year ago for same date. Russia is expected to harvest 80-82 million tonnes of wheat in 2017.

The world's largest buyer of wheat has extended 13.5% moisture content limit by nine months. The extension was first implemented in February for nine months which was about to expire in October. The new nine month period will be active from 03rd October'17. However excessive moisture can reduce quality and increase risk of mould and insect damage. The limit has been extended to increase healthy competition among different origins that are willing to supply wheat in state tenders.

Outlook: Cash market is expected to trade steady to weak in the near term.
