

Wheat Domestic Fundamentals:

According to latest update, area sown until 05th January'18 is 283.46 lakh hectares compared to 297.67 lakh hectares in the previous Rabi season. The normal area is 304.43 lakh hectares. Progressive area was reported lower in Maharashtra, Uttar Pradesh and Madhya Pradesh compared to last year for same date.

As per Agriwatch preliminary estimate production is likely to be around 91.4 MMT compared to 93.5 MMT last year. Production is likely to fall due to lower acreage this year. As per fourth advance estimate for 2016-17 wheat production is likely to be around 98.8 MMT which is higher compared to third advance estimate of 97.4 MMT.

As per latest update, Government of India has extended relaxation on fumigation of agriculture commodities using methyl bromide until 30th June 2018. Earlier government has provided an extension until 31st December 2017. Trade sources indicate that increase in import duty has curbed imports but it hasn't put a complete stop on imports.

Wheat prices are under pressure due to ample availability in the market created by good domestic production and higher imports. This year progressive sowing is at lower side compared to last year and Madhya Pradesh has reported the highest dip due to lower availability of water. Wheat farmers in Madhya Pradesh have shifted to Chana, as it requires less irrigation.

As per trade sources, import quotes for wheat from various origins to Tuticorin port witnessed steady to weak tone in the week. As of now Tuticorin port price for APW is being quoted at Rs 2025 per quintal, ASW at Rs 1925 per quintal and Ukrainian wheat at Rs 1745 per quintal. Ample availability in the market is keeping global wheat prices under pressure.
