

**Wheat Domestic Fundamentals:**

**As per trade sources, import quotes for wheat from various origins to Tuticorin port, witnessed steady to slightly firm tone in the week.** As of now Tuticorin port price for APW is being quoted at Rs 2100-2120 per quintal, ASW at Rs 2000-2030 per quintal and Ukrainian wheat at Rs 1840-1860 per quintal. Prices are likely to stay steady to firm in the coming week.

**Wheat WPI has increased slightly from 139.4 in December-17 to 140.8 in January-2018.** Monthly wheat inflation has increased by 1.00 percent in January-2018 compared to previous month. As compared to January-2017 wheat WPI has decreased by around 6.94 percent.

**Government has fixed wheat procurement target at 32 MMT for 2018-19.** Government target procurement for MY 2017-18 was 33 MMT against which it procured only 30.8 MMT.

**As per latest update, wheat crop has been damaged in state of Madhya Pradesh and Maharashtra** due to untimely rain and hailstorm. More than one lakh hectares of crop has been damaged in Maharashtra, especially in Vidharba and Marathwada region. Sehore, Vidisha, Guna Rajgarh, Harda, Betul and Raisen were impacted in Madhya Pradesh. Farmers in both states have been warned against bad weather in upcoming days and are advised to harvest their crops as early as possible.

**There is a rumour in the market that government may increase import duty** on wheat from 20 percent to 30 percent. This step will put a complete halt on imports and provide support to domestic prices.

**Madhya Pradesh Chief Minister Shivraj Singh Chouhan announced that Madhya Pradesh government will provide additional bonus of Rs 200 per quintal** over MSP of Rs 1735 per quintal on wheat in marketing year 2018-19.

**According to latest update, area sown until 09th February'18 is 304.29 lakh hectares compared to 317.88 lakh hectares in the previous Rabi season.** The normal area is 304.43 lakh hectares. Progressive area was reported lower in Haryana, Maharashtra, Uttar Pradesh, Rajasthan and Madhya Pradesh compared to last year for same date.

**As per latest update by DGCIS, India has exported around 179699 metric tonnes of wheat in April-December (2017-18) compared to 218494 metric tonnes in April- December (2016-17).** In terms of value, exports have decreased by around 13 percent. Overall condition for Indian wheat export is not favourable and export volume would remain low in coming months as other countries are able to provide wheat at lower prices.

**As per Agriwatch preliminary estimate production is likely to be around 91.4 MMT compared to 93.5 MMT last year.** Production is likely to fall due to lower acreage this year. As per fourth advance estimate for 2016-17 wheat production is likely to be around 98.8 MMT which is higher compared to third advance estimate of 97.4 MMT.

**As per fourth advance estimate for 2016-17 wheat production is likely to be around 98.8 MMT which is higher compared to third advance estimate of 97.4 MMT.** The total food grain production has been pegged at 275.68 MMT compared to 251.57 MMT in final estimate of 2015-16.

**International Market Update:**

**As per latest update, Japan's ministry of agriculture bought 84683 MMT of food quality wheat** from United States and Canada. Around 60463 MMT has been bought from United States and around 24220 MMT has been bought from Canada. Shipments from United States and Canada will be loaded between March 21 and April 20.

**As per latest update by FranceAgrimer, French soft wheat exports to Non-European countries in 2017-18** season is likely to be around 9.0 MMT compared to forecast of 9.3 MMT in the previous month. It has also lowered its outlook for soft wheat shipments within EU to 8.45 MMT from 8.60 MMT last month. This downward revision of exports has led to increase in projected stocks of EU.

**Wheat growers in black sea region have captured share of Australia in south-east Asian market.** Since 2012, Australia has lost around 20 percent of its market share to black sea region. Traders in black sea region are still able to make profit despite wheat glut due to lower production cost. Furthermore they are able to increase wheat yields per hectare at a faster rate than Australia.

**Outlook:** Cash market is expected to trade steady to firm in the near term.
