

Wheat Domestic Fundamentals:

All India weekly average prices increased by 5.38 percent to Rs. 1868.76 per quintal during the week ended 08th March 2018. Wheat average price were ruling at Rs 1773.42 per quintal during 24-28 February 2018. As compared to prices in the week 01-08 March 2017, the prices are weak by 9.81 percent. Prices are expected to remain steady to firm in coming days.

As per France custom department, India has imported no wheat since July'17 until January'18 compared to 107910 tonnes during the same period in 2016-2017. India fulfilled its import requirement by buying from Black sea region and Australia.

FCI will offer a total quantity 1204000 tonnes of wheat in different states through e-auction on 03rd March at a reserve price of Rs 1790 per quintal. Sales through E-Auction of wheat are at lower side this year due to high domestic production and imports.

India has received 12.6 mm of actual rainfall against 22.2 mm of normal rainfall in the month of February 2018. In the month of February 2018, deficient rainfall was recorded in Punjab, Haryana, Uttar Pradesh, Rajasthan, Haryana, West Madhya Pradesh, etc. No rain was seen in Gujarat region in the same month. Temperatures have been increasing in past week impacting growth period of wheat in maturity stage. Moderate rain in upcoming days is likely to benefit standing crop.

As per trade sources, import quotes for wheat from various origins to Tuticorin port, witnessed steady to firm tone in the week. As of now Tuticorin port price for APW is being quoted at Rs 2180-2200 per quintal, ASW at Rs 2020-2030 per quintal and Ukrainian wheat at Rs 1850-1855 per quintal. Ample availability in the market is keeping global wheat prices under pressure.

Authorities in Punjab have advised farmers to use pesticides to protect their wheat crop from aphids aka tela. Tela usually attacks the crop during rising temperatures. Farmers have reported tela in Kapurthala, Pathankot, Amritsar and Jalandhar districts. Wheat fields those are close to mustard crop have been affected more as yellow color attracts the insect. Punjab is likely to receive rains in coming days, which would lead to death of the pest. Furthermore Kurukshetra district of Haryana has also reported yellow rust on a small scale. Overall crop condition in both the states is good.

As per latest update, showers accompanied with hailstorm were noticed in Jaipur, Alwar, Sawai Madhopur and Jhunjhunu district of Rajasthan. No reports of damage to wheat crop have been received yet. However there are news that mustard crop have been slightly affected. Chief Minister Vasundhara Raje too has ordered for an early crop assessment to take further actions, if need be.

As per second advance estimate, India is likely to produce 97.11 MMT of wheat compared to 98.51 MMT in previous year. The total food grain production is expected at record 277.49 MMT compared to 275.11 MMT last year. This year overall acreage is lower by around 4.27% compared to last years' acreage of 317.88 lakh hectares.

As per Agriwatch preliminary estimate production is likely to be around 91.4 MMT compared to 93.5 MMT last year. Production is likely to fall due to lower acreage this year. As per fourth advance estimate for 2016-17 wheat production is likely to be around 98.8 MMT which is higher compared to third advance estimate of 97.4 MMT.

International Market Update:

Major feedmill group of south korea has purchased around 65000 tonnes of feed wheat at \$233.40/tonne cost and freight. Around \$1.5 per tonne will be charged for port unloading. The quantity is likely to be shipped between May 11 and June 10. Feed wheat can be sourced from any origin except Pakistan, India, Denmark and Argentina.

Japan is likely to raise imported wheat price for domestic millers by 3.5 percent. As of now the average price is around 54370 yen (\$513) per tonne. This move was taken due to higher to higher price quotes by supplier, increase in shipping rates and a weaker yen. Japan buys most of its milling wheat through import tenders from Australia, Canada and the United States.

As per latest update, China has lifted embargo on import of wheat from Russia's Amur and Chelyabinsk region. In 2016, China lifted embargo from Russia's Novosibirsk, Novosibirsk, Krasnoyarsk and Altai regions. China bought 0.4 percent (17966 tonnes) of its total wheat from Russia in 2017.

Outlook: Cash market is expected to trade steady to firm in the near term.
