

**Wheat Domestic Fundamentals:**

**Government agencies have started procurement since 15th March'18. Until 28th May'18 government has procured around 340.81 lakh tonnes of wheat.** Of the total quantity procured, around 126.69 lakh tonnes have been procured from Punjab, 87.37 lakh tonnes from Haryana, 38.27 lakh tonnes from Uttar Pradesh, 72.45 lakh tonnes have been procured from Madhya Pradesh, 14.62 in Rajasthan, 0.91 lakh tonnes from Uttarakhand, 0.14 lakh tonnes from Chandigarh and 0.36 lakh tonnes from Gujarat. In Rabi marketing season 2018-19 government has set procurement target of 32 MMT. Government has abundant supplies this year, which will allow it to control any unexpected price rise.

**As per trade sources, import quotes for wheat from various origins to Tuticorin port, witnessed firm tone in the week.** Traders are not quoting prices for APW due to lower availability. As of now Tuticorin port price ASW at Rs 2065-2075 per quintal and Ukrainian wheat at Rs 1905-1915 per quintal. Wheat supplies are likely to tighten this year.

**As per latest update, wheat stock in central pool as on 1st May'18 stood at 353.45 lakh tonnes up by 167.14% compared to last month.** This quantity is higher by around 19.24% compared to last year for the same month. Government has surpassed their procurement target of 32 MMT this year. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. The stock position as on 01st May'18 is highest in last four years. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

**As per forecast issued by IMD, southwest monsoon has arrived in south Andaman Sea and is likely to enter kerala in next four days.** If this forecast issued by IMD holds, monsoon will arrive at least three days before this year. Furthermore, good rainfall can also be expected in parts of central India in between June 01 and June 15. IMD has already issued that India is likely to have a normal monsoon at 97 percent of LPA.

**As per notification issued by CBEC, government has increased import duty on wheat to 30 percent** from current 20 percent in order to curb imports and provide support to domestic prices. Government has ample wheat stock this year due to good procurement and increase in import duty will curb inflow of wheat from other countries like Australia and Russia/Ukraine.

**All India weekly average prices increased by 6.84 percent to Rs. 1947.59 per quintal** during the week ended 23rd May 2018. Wheat average price were ruling at Rs 1822.82 per quintal during 09-15 May 2018. As compared to prices in the week 16-23 May 2017, the prices are weak by 1.28 percent. Prices are expected to remain firm in coming days due to decrease in arrivals and expected increase in import duty.

**As per third advance estimate, India is likely to produce 98.61 MMT of wheat compared to 97.11 MMT** in second estimate. The total food grain production is expected at record 279.51 MMT, up by around 0.72% compared to second estimate.

**As per trade source, India has exported around 4.24 thousand tonnes in the month of April** compared to 1.84 thousand tonnes in March. The quantity in March was exported at an average FOB of \$ 357.32 per tonne and the major destinations were UAE, UK, Sri Lanka, Vietnam and Somalia. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

**As per trade source, India has imported around 30780.34 tonne wheat from Australia in the month** of February at an average CIF of \$256.50 per tonne. The entire quantity has been imported at Tuticorin port. Furthermore, no wheat has been imported in the month of March due to expectation of good crop.

**International Market Update:**

**Wheat prices are gaining around the globe in major producing countries due to unfavorable weather conditions.** Extreme heat in US HRW (Hard Red Winter) areas, Dry weather in Australia, enhancement in dry conditions in Southern Russia and Canadian prairies is threatening yields. Russia has already reduced its total grain crop by 5 MMT. Therefore new crop prices are likely to remain firm given; no improvement in current condition is seen.

**As per latest update, Egypt's top administrative court has decided to freeze the order of lower court** for banning ergot completely. Furthermore it has also allowed import of wheat with marginal levels. Egypt is the largest importer of wheat and receives almost 33 percent of Russian Wheat

**IGC has projected global wheat production to be 742 MMT for 2018-19 against 758 MMT for 2017-18.** IGC has projected lower production for 2018-19 however; carryover stocks are still at higher side. Trade projection for 2018-19 has been increased to 179 MMT against 176 MMT for 2017-18. Consumption has been increased by 6 MMT to 746 MMT for 2018-19 against 740 MMT for 2017-18.

**Outlook:** Cash market is expected to trade steady to firm in the near term.
