

Wheat Domestic Fundamentals:

Government agencies have started procurement since 15th March'18. Until 08th June'18 government has procured around 351.39 lakh tonnes of wheat. Of the total quantity procured, around 126.91 lakh tonnes have been procured from Punjab, 87.39 lakh tonnes from Haryana, 47.59 lakh tonnes from Uttar Pradesh, 72.87 lakh tonnes have been procured from Madhya Pradesh, 15.07 in Rajasthan, 1.02 lakh tonnes from Uttarakhand, 0.14 lakh tonnes from Chandigarh, 0.37 lakh tonnes from Gujarat and 0.03 lakh tonnes from Bihar. In Rabi marketing season 2018-19 government has set procurement target of 32 MMT. Government has abundant supplies this year, which will allow it to control any unexpected price rise.

All India average monthly prices for wheat decreased by 0.62 percent from Rs 1828.66 (in April -2018) to Rs 1817.36 per qtl in May-2018. Average price (May) is higher by 0.90 percent compared to price (Rs 1801.19 per qtl.) registered in May - 2017. Prices are expected to trade steady to firm.

As per trade sources, import quotes for wheat from various origins to Tuticorin port, witnessed firm tone in the week. Traders are not quoting prices for APW due to lower availability. As of now Tuticorin port price ASW at Rs 2105-2115 per quintal and Ukrainian wheat at Rs 1910-1920 per quintal. Wheat supplies are likely to tighten this year.

As per latest update, wheat stock in central pool as on 1st May'18 stood at 353.45 lakh tonnes up by 167.14% compared to last month. This quantity is higher by around 19.24% compared to last year for the same month. Government has surpassed their procurement target of 32 MMT this year. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. The stock position as on 01st May'18 is highest in last four years. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

As per forecast issued by IMD, southwest monsoon has arrived in south Andaman Sea and is likely to enter kerala in next four days. If this forecast issued by IMD holds, monsoon will arrive at least three days before this year. Furthermore, good rainfall can also be expected in parts of central India in between June 01 and June 15. IMD has already issued that India is likely to have a normal monsoon at 97 percent of LPA.

As per notification issued by CBEC, government has increased import duty on wheat to 30 percent from current 20 percent in order to curb imports and provide support to domestic prices. Government has ample wheat stock this year due to good procurement and increase in import duty will curb inflow of wheat from other countries like Australia and Russia/Ukraine.

As per third advance estimate, India is likely to produce 98.61 MMT of wheat compared to 97.11 MMT in second estimate. The total food grain production is expected at record 279.51 MMT, up by around 0.72% compared to second estimate.

As per trade source, India has exported around 4.24 thousand tonnes in the month of April compared to 1.84 thousand tonnes in March. The quantity in March was exported at an average FOB of \$ 357.32 per tonne and the major destinations were UAE, UK, Sri Lanka, Vietnam and Somalia. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

As per trade source, India has imported around 30780.34 tonne wheat from Australia in the month of February at an average CIF of \$256.50 per tonne. The entire quantity has been imported at Tuticorin port. Furthermore, no wheat has been imported in the month of March due to expectation of good crop.

International Market Update:

Russia was able to export around 1.14 MMT of wheat to Australia during July'17-March-18. Black sea region was able to capture market share in Indonesia due to its competitive pricing and lower freight rates. Russian wheat is also being used in various flour blends in Indonesia.

Algeria state grains agency OAIC has bought around 90000-120000 tonnes of milling wheat in a tender. The prices paid were in the range of \$229.00-230.00 per tonne (Cost and Freight). Origin of wheat is optional but most of it likely to be from France. The country does not disclose the results of its tenders and purchase reports are based on trade assessments.

Russian milling wheat prices remained weak by \$1-2 per tonne in Novorossiysk and \$10-11 per tonne at Odessa compared to last week. Trading activity is low as traders are waiting for new crop that is likely to approach market soon. Russia is expected to produce around 74 MMT of wheat in 2018-19. As of now Russian milling wheat with 12.5% protein content at Novorossiysk port is being quoted at FoB \$208.00-211.00/tonne whereas milling wheat with 12.5% protein content at Odessa is being quoted at FoB \$197.00-202.00/tonne.

Outlook: Cash market is expected to trade steady to weak in the near term.
