

Wheat Domestic Fundamentals:

As per trade sources imported wheat from various origins to Tuticorin port witnessed firm tone in the week. As of now Tuticorin port price for ASW is Rs 2305-2315 per quintal and Ukrainian wheat is Rs 2090-2110 per quintal. Australian Premium Wheat (APW) is not available in the domestic market. Stock of imported wheat has declined in past months as no quantity has been imported since February 2018 from Australia or Black sea region.

All India weekly average prices decreased by 1.44 percent to Rs. 2019.19 per quintal during the week ended 15th August 2018. Wheat average price were ruling at Rs 2048.77 per quintal during 01-08 August 2018. As compared to prices in the week 09-15 August 2017, the prices are firm by 4.02 percent. Prices are expected to remain firm in coming days due to increase in import duty and good domestic demand.

As per latest update, wheat stock in central pool as on 1st August'18 stood at 405.58 lakh tonnes down by 2.97% compared to last month. This quantity is higher by around 34.93% compared to last year for the same month. Government has surpassed their procurement target of 32 MMT this year. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. The stock position as on 01st August'18 is highest in last four years. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

Wheat WPI has increased slightly from 143.1 in June-2018 to 144.9 in July-2018. Monthly wheat inflation has increased by 1.26 percent in July -2018 compared to previous month. As compared to July-2017 wheat WPI has increased by around 6.31 percent. Wheat WPI is expected to stay steady to slightly firm in coming months.

As per trade source, India has exported around 2.17 thousand tonnes in the month of June compared to 2.31 thousand tonnes in May. The quantity in June was exported at an average FOB of \$ 432.95 per tonne and the major destinations were Nepal, UAE, Malaysia, Kuwait and Singapore. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices. Furthermore, after increase in import duty to 30 percent imports have decreased substantially. India has imported no wheat in the month of June-2018. Imports are expected to be low this year due to good domestic availability and increase in import duty. India has imported around 31000 tonnes in the month of February-2018.

IMD has already issued its forecast for normal monsoon during June-September'18 and rainfall is expected to be 97% of the LPA. However, IMD may downgrade its forecast for Monsoon during August and September which will eventually lead to fall in the prediction for entire season. Below normal monsoon will lead to lower soil moisture, which in turn will slightly affect yield of wheat during rabi season.

Previous Updates:

Government agencies have started procurement since 15th March'18. For RMS 2018-19, government has procured around 355.22 lakh tonnes of wheat. Of the total quantity procured, around 126.91 lakh tonnes have been procured from Punjab, 87.39 lakh tonnes from Haryana, 50.88 lakh tonnes from Uttar Pradesh, 72.87 lakh tonnes have been procured from Madhya Pradesh, 15.31 in Rajasthan, 1.09 lakh tonnes from Uttarakhand, 0.14 lakh tonnes from Chandigarh, 0.37 lakh tonnes from Gujarat, 0.25 lakh tonnes from Bihar and 0.01 lakh tonnes from Himachal Pradesh. In Rabi marketing season 2018-19 government has set procurement target of 32 MMT. Government has abundant supplies this year, which will allow it to control any unexpected price rise.

International Market Update:

As on 13th August, US have harvested 94 percent of winter wheat and 35 percent of spring wheat. Harvest in Ukraine is nearly complete and farmers have harvested around 24.9 MMT of wheat in 2018-19. In Saskatchewan, around 24 percent and 3 percent of winter wheat and durum wheat has been harvested respectively. As per Buenos Aires grain exchange wheat planted area in Argentina has increased by 7 percent compared to 6.1 million acres last year. Global wheat crop is expected to be lower this year, which is likely to provide support to global wheat prices.

Wheat crops have suffered in Northern Europe, Australia, Canada and Russia due to unfavourable weather conditions. USDA expects world production is likely to be around 729.63 MMT in 2018-19 compared to 758 MMT last year. Strategie Grains have lowered forecast for soft wheat in Europe from 130 MMT to 127.7 MMT. As per USDA, Russia's wheat crop is expected to be around 68 MMT down from 85 MMT last year. USDA did not change forecast for Australia but private forecasters believe the crop to be around 20 MMT. Lower availability will support global wheat prices.

Russian milling wheat prices became weak by \$2-3 per tonne at Novorossiysk and \$2-3 per tonne at Odessa compared to last week. After surge in prices during past weeks, prices have started easing. As per USDA, Russia is expected to produce 68.00 MMT in 2018 compared to 84.99 MMT in 2017. As of now Russian milling wheat with 12.5% protein content at Novorossiysk port is being quoted at FoB \$228.00-232.00/tonne whereas milling wheat whereas wheat with 12.5% protein content at Odessa is being quoted at FoB \$228.00-232.00/tonne.

Outlook: Cash market is expected to trade steady to firm in the near term.
