

Wheat Domestic Fundamentals:

All India weekly average prices decreased by 0.94 percent to Rs. 2147.23 per quintal during the week ended 15th January 2019. Wheat average price were ruling at Rs 2167.57 per quintal during 01-08 January 2019. As compared to prices in the week 09-15 January 2018, the prices are firm by 15.40 percent. Prices are expected to remain weak in coming days due to abundant availability in domestic market.

As per market sources, wheat stock in central pool as on 1st January'19 stood at 271.00 lakh tonnes down by 11.52% compared to last month. This quantity is higher by around 38.53% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. The stock position as on 01st January'19 is highest in last four years. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

As per latest update, area sown until 11th January'18 is 294.07 lakh hectares compared to 300.51 lakh hectares in the previous Rabi season. The normal area is 306.29 lakh hectares. Acreage is expected to be higher this Rabi season due to increase in MSP by Rs 105 per quintal for MY 2018-19. Acreage of wheat in Madhya Pradesh is higher as farmers have shifted from chickpea. This year, as on 11th January'18, farmers have sowed 59.00 lakh hectares of wheat in Madhya Pradesh compared to 58.03 Lakh hectares last year on same date.

Wheat WPI has increased from 152.2 in November-2018 to 152.8 in December-2018. Monthly wheat inflation has increased by 0.39 percent in December-2018 compared to previous month. As compared to December-2017 wheat WPI has increased by around 9.61 percent. Wheat WPI is expected to stay steady to weak in coming months.

As per latest update, Conducive weather conditions have increased the probability of good harvest in MY 2019-20. Low temperatures during day and night, with clear skies have boosted vegetative growth of the crop. Furthermore, low temperature has also helped in retaining soil moisture, which otherwise would have adversely impacted the crop in absence of rain. Good production in MY 2019-20 may lead to oversupply in domestic market.

As per trade sources, after increase in import duty to 30 percent imports have decreased substantially. India has imported no wheat in the month of November-2018. Imports are expected to be low this year due to good domestic availability and increase in import duty. India has imported around 1000 tonnes in the month of September-2018.

As per trade source, India has exported around 2.73 thousand tonnes in the month of November compared to 5.09 thousand tonnes in October. The quantity in November was exported at an average FOB of \$ 416.11 per tonne and the major destinations were Nepal, Sri Lanka and Somalia. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

Previous Updates:

As per fourth advance estimate, wheat production has been pegged at 99.70 MMT compared to 98.61 MMT in its third advance estimate issued in the month of May-2018. Total food grain output is expected to be around 284.43 MMT compared to 279.51 MMT in earlier estimate.

International Market Update:

Jordan has bought 60000 tonnes of hard milling wheat at \$269.95 per tonne cost and freight for delivery in first half of March. The tender closed on Tuesday and wheat can be sourced from optional origin. The seller was trading house Ameropa. Two other companies, CHS and Cerealscom Dolj offered wheat at \$275.54 per tonne and \$272.70 per tonne respectively.

Pakistan government on 20th November 2018 decided to export 5 LMT of subsidized wheat to reduce oversupply in domestic market. Pakistan Agricultural Storage and Services Corporation (PASSCO) issued a tender to for the same that closed on 11th January 2019. Around twelve offers were received that were above the minimum target price of \$233 per tonne ex inland store, which means that wheat can be sold without a state subsidy. FoB cost after including cargo handling and inland transport costs will be around \$250 per tonne. Wheat is likely to be sold to Sri Lanka, the United Arab Emirates, Oman and Indonesia.

As per latest update, Analyst have increased forecast for grain exports by 2.1 percent to 46.07 MMT during the 2018/19 July- June season. Of the total quantity, Ukraine is expected to export 25.75 MMT of corn, 15.5 MMT of wheat and 4.1 MMT of barley.

Drought in Australia has led Agrocrops to import 33000 MT of wheat from west Australia to east Australia. West Australia wheat is generally exported to Asia and Middle-East. Therefore, west Australia wheat is being imported by east to meet the local demand.

Outlook: Cash market is likely to trade steady to weak in the near term.
