

Wheat Domestic Fundamentals:

As per latest update, Rain and Hail in some districts of Madhya Pradesh and damaged wheat and chickpea crop. Both the crops were fully grown and ready for harvest before the damage occurred. This damage is not likely to make any significant impact on total production due to record wheat acreage in Madhya Pradesh. Furthermore, ample stock with government will ensure that there are no unexpected surges in prices.

The government is planning to initiate open market sale during the procurement season. Generally open market sales starts after procurement ends. However, in this season, stock position for wheat is at higher side. Therefore to make way for new crop, government wants to liquidate wheat stocks in open market. In the previous season government sold 7 MMT of wheat in open market against a target of 10 MMT. Sale target for current season is likely to be same.

All India weekly average prices increased by 0.53 percent to Rs. 2045.85 per quintal during the week ended 08th April 2019. Wheat average price were ruling at Rs 2035.07 per quintal during 24-31 March 2019. As compared to prices in the week 01-08 April 2018, the prices are firm by 7.58 percent. Prices are expected to remain weak in coming days due to abundant availability and arrival pressure in domestic market.

India mainly imports from Australia and Russia. Wheat prices remained steady to weak in past week. As of now, Russian wheat with 12.5 percent protein content and Australian premium wheat (APW) is being quoted at \$336.70 (Rs 23400.00) per tonne and \$328.61 (Rs 22835.00) per tonne respectively, after including freight and import duty @30%. Local expenses will further add to cost. Whereas wheat mill quality price in Chennai and Coimbatore is ruling around Rs 21500 per tonne and Rs 22000 per tonne respectively.

India is not likely to import wheat in MY 2019-20 due to three consecutive good production years. India has abundant supplies to meet its domestic demand for wheat. Wheat in central pool as on 01st April'19 is expected to be around 18.50 MMT. As of now prices will remain under pressure due to fresh arrivals.

Government agencies have started procurement. Until 04th April'19 government has procured around 1.36 lakh tonnes of wheat. Of the total quantity procured, around 1.32 lakh tonnes have been procured from Madhya Pradesh and 0.04 lakh tonnes from Rajasthan. In Rabi marketing season 2019-20 government has set procurement target of 35.70 MMT.

As per trade sources, after increase in import duty to 30 percent imports have decreased substantially. India has imported no wheat in the month of February-19. Imports are expected to be low this year due to good domestic availability and increase in import duty. India has imported around 1000 tonnes in the month of September-2018.

As per trade source, India has exported around 6.35 thousand tonnes in the month of February-2019. The quantity in February-2019 was exported at an average FOB of \$ 403.91 per tonne and the major destinations were Nepal, UAE and Kuwait. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

International Market Update:

Bangladesh has bought 50000 tonnes of wheat with 12.5 percent protein content from trading house Agrocorp at \$268.92 per tonne. As per FAO Bangladesh's wheat imports for 2018-19 are expected to touch record high of 6 MMT. Demand for wheat in Bangladesh has increased as wheat is being substituted for more expensive rice.

Russian milling wheat prices were weak by \$1-2 per tonne at Novorossiysk and by \$1 per tonne at Odessa port. Trading activity in Russian wheat market is low. As per IGC, Russia is expected to produce 77.10 MMT in 2019-20 compared to 71.70 MMT in 2018-19. As of now Russian milling wheat with 12.5% protein content at Novorossiysk port is being quoted at FoB \$222.00-227.00/tonne and milling wheat with 12.5% protein content at Odessa is being quoted at FoB \$222.00-227.00/tonne.

As per latest update, Egypt has rejected French around 63000 tonnes of wheat shipment due to high ergot content. Ergot level was found at 0.1 percent whereas the acceptable limit is 0.05 percent. Earlier Egypt has rejected Romanian wheat due to a non-specified "quality issue".

Feed Leaders Committee of South Korea has purchased around 65000 tonnes of feed wheat at \$212.99/tonne cost and freight. Around \$1.25 per tonne will be charged for port unloading. The quantity is likely to be shipped by September 30th. Feed wheat can be sourced from any origin.

Taiwan flour mills association has bought 110000 tonnes of milling wheat from United States. Of the total quantity, 27910 tonnes of U.S. dark northern spring wheat of 14.5 percent protein content bought at FOB \$254.13 per tonne, 19665 tonnes of hard red winter wheat of 12.5 percent protein content was bought at FoB \$244.88 per tonne and 7425 tonnes of soft white wheat with 9 percent protein was bought at FoB \$222.30 per tonne. The seller was trading house Cargill.

Outlook: Cash market is likely to trade steady to weak in the near term.
