

Wheat Domestic Fundamentals:

As per latest update exports of Potato, Onion, Rice, Wheat Flour, Sugar, Dal and Eggs have been exempted from any domestic restriction or prohibitions with effect from April'19 under bilateral trade agreement between India and Maldives. The export quantity for Rice and Wheat flour for 2019-20 is 89.45 thousand tonnes and 78.61 thousand tonnes respectively. The quantity for Rice and Wheat flour is higher by 88.51% and 78.28% respectively compared to 2018-19. India is pushing its exports through via G2G trade. In case of wheat, such agreements will help in easing domestic stockpiles.

India mainly imports from Australia and Russia. Wheat prices remained weak in past week. As of now, Russian wheat with 12.5 percent protein content and Australian premium wheat (APW) is being quoted at \$337.40 (Rs 23405.44) per tonne and \$311.22 (Rs 21589.33) per tonne respectively, after including freight and import duty @40%. Local expenses will further add to cost. Whereas wheat mill quality price in Chennai and Coimbatore is ruling around Rs 22000 per tonne and Rs 22500 per tonne respectively.

FCI will sell wheat in the open market at a reserve price of Rs 2080 per quintal during the procurement period April-June and this price will be increased by Rs 55 per quintal in subsequent quarters. This reserve price is valid for Punjab, Haryana and Madhya Pradesh. For other states, railway freight (Ex-Ludhiana) and road transport cost will be added to the reserve price of the nearest depot. Reserve price for MY 2019-20 is higher by Rs 240 per quintal compared to MSP. Therefore private millers/traders may try to buy as much quantity as possible to during procurement season to avoid paying a higher price later.

India has seen three consecutive years of good wheat production. Wheat prices are likely to stay steady to slightly firm as arrival pressure is likely to ease in domestic market. Import duty of 40% on wheat will ensure there are no imports from Australia and Russia/Ukraine. Import restriction due to duty has provided favorable prices for wheat in domestic market. However, domestic prices are not able to get support from exports as other major producing country are able provide wheat at lower prices.

Government agencies have started procurement. Until 03rd May'19 government has procured around 242.52 lakh tonnes of wheat. Of the total quantity procured, around 99.76 lakh tonnes have been procured from Punjab, 82.11 lakh tonnes from Haryana, 12.30 lakh tonnes from Uttar Pradesh, 42.05 lakh tonnes from Madhya Pradesh, 5.93 lakh tonnes from Rajasthan, 0.22 lakh tonnes from Uttarakhand, 0.11 lakh tonnes from Chandigarh and 0.04 lakh tonnes from Gujarat. In Rabi marketing season 2019-20 government has set procurement target of 35.70 MMT.

All India weekly average prices increased by 1.94 percent to Rs. 2045.95 per quintal during the week ended 31st April 2019. Wheat average price were ruling at Rs 2007.07 per quintal during 16-23 April 2019. As compared to prices in the week 24-31 April 2018, the prices are firm by 7.03 percent. Prices are expected to remain steady to slightly firm in coming weeks due to hike in import duty and decrease in arrival pressure.

Government has increased import duty on wheat from 30 percent to 40 percent. This is done to make sure that there is no window left for cheaper imports. Three consecutive good production years have led to ample availability in the domestic market. Furthermore, it will also provide support to government in offloading wheat stocks as without any import parity private traders/millers will buy from FCI.

As per trade source, India has exported around 10.69 thousand tonnes in the month of March-2019. The quantity in March-2019 was exported at an average FOB of \$ 341.00 per tonne and the major destinations were Nepal, UAE and Sri Lanka. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

International Market Update:

Major feed mill group of South Korea has purchased around 65000 tonnes of feed wheat at \$204.75/tonne cost and freight, including a surcharge for additional port unloading. Feed wheat can be sourced from any optional worldwide origins. The seller is believed to be trading house Cofco.

Jordan has bought 60000 tonnes of hard milling wheat at \$213.00 per tonne cost and freight for delivery in second half of September. The tender closed on Tuesday and wheat can be sourced from optional origin. The seller was trading house Ameropa. One other company, Nibulon offered wheat at \$219.00 per tonne per tonne.

Favorable weather during spring season in black sea region has increased the probability of bumper grain harvest. The level of soil moisture is good in major grain producing regions. As per IGC, Russia and Ukraine are expected to produce 79.50 MMT and 27.50 MMT of wheat in 2019-20. Black sea is likely to dominate global exports in 2019-20.

Australia has started sowing wheat in dry soil conditions for the third consecutive year. If the current weather condition persists, wheat production will be around 18.00 MMT. However wheat prices will not spike due to ample availability in global market. Traditional buyer of Australian wheat, such as Indonesia, have turned to Russia and Ukraine to secure supplies.
