

Wheat Domestic Fundamentals:

All India weekly average prices increased by 0.57 percent to Rs. 2034.91 per quintal during the week ended 08th June 2019. Wheat average price were ruling at Rs 2023.41 per quintal during 24-31 May 2019. As compared to prices in the week 01-08 June 2018, the prices are firm by 5.75 percent. Prices are expected to remain steady to slightly in coming days due to hike in import duty and likely increase in demand in upcoming weeks.

Wheat procurement in Uttar Pradesh has been hit as traders/millers are directly buying from farmers at much lower rate compared to reserve price of Rs 2080 per quintal. Wheat procurement is likely to end in upcoming weeks and against a target of 5.5 MMT in Uttar Pradesh government has procured 3.4 MMT. However Wheat market is expected to trade steady to slightly firm due to increase in import duty and a likely increase in demand in upcoming weeks. Availability in domestic market is sufficient to meet domestic demand.

Government agencies have started procurement. Until 07th June'19 government has procured around 338.21 lakh tonnes of wheat. Of the total quantity procured, around 129.12 lakh tonnes have been procured from Punjab, 93.20 lakh tonnes from Haryana, 34.62 lakh tonnes from Uttar Pradesh, 67.25 lakh tonnes from Madhya Pradesh, 0.02 lakh tonnes from Bihar, 13.40 lakh tonnes from Rajasthan, 0.42 lakh tonnes from Uttarakhand, 0.12 lakh tonnes from Chandigarh, 0.05 lakh tonnes from Gujarat and 0.01 lakh tonnes from Himachal Pradesh. In Rabi marketing season 2019-20 government has set procurement target of 35.70 MMT.

Wheat market is expected to trade steady to slightly firm due to increase in import duty and a likely increase in demand in upcoming weeks. Increase in import duty is likely to put a complete halt on imports in MY 2019-20. Availability in domestic market is sufficient to meet domestic demand.

India mainly imports wheat from Australia and Russia. Millers prefer Australian wheat over Russian/Ukrainian wheat due to better quality. As of now, Australian standard wheat (ASW) and Australian premium wheat (APW) is being quoted at \$342.09 (Rs 23751.31) per tonne and \$346.92 (Rs 24086.66) per tonne respectively, after including freight and import duty @40%. Local expenses will further add to cost. Whereas wheat mill quality price in Chennai and Coimbatore is ruling around Rs 23000 per tonne and Rs 23500 per tonne respectively.

The government is set to provide additional food grains under NFSA to ease the stock position. Under NFSA 5 kg of food grains are provided to people living below poverty line at a subsidized rate of Rs 1, Rs 2 and Rs 3 per kg for Coarse grains, rice and wheat respectively. The union cabinet may decide to provide an additional 2kg of food grains to every NFSA beneficiary. This move will result in reduction of carrying cost for various food grains with the government.

As per trade sources, after increase in import duty to 40 percent imports have decreased substantially. India has imported 498.77 MT of Australia prime hard wheat at Tuticorin port in the month of April-19. Imports are expected to be low this year due to good domestic availability and increase in import duty. Prior to this, India has imported around 1000 tonnes in the month of September-2018.

As per trade source, India has exported around 5.57 thousand tonnes in the month of April-2019. The quantity in April-2019 was exported at an average FOB of \$ 388.15 per tonne and the major destinations were Nepal, UAE and Sri Lanka. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

International Market Update:

As per latest update, Japan's ministry of agriculture bought 77042 MT of food quality wheat from United States and Australia. Around 58157 MT has been bought from United States and 18885 MT of standard white wheat has been bought from west Australia. Shipments from United States and Australia will be loaded between Aug 01 and Aug 31, 2019.

As per latest update, hot and dry weather is likely to continue at Australia's east coast and there is only 30 percent chance of rainfall between June 01 and August 30. Furthermore, there is 70 percent probability that entire Australia will experience warmer than average temperatures. Private analyst are expecting wheat production to be around 18 MMT in 2019-20. Australia has already agreed to import 50000-60000 MT of wheat from Canada in upcoming weeks. In case of third consecutive lower production, Australia may be seen importing more wheat.

Russian wheat prices increased by \$2 per tonne in the past week. The firmness in prices was mainly due to increase in global benchmark such as CBOT. Wheat with 12.5 percent protein was quoted at FoB \$188 per tonne. Russia will start harvesting its winter wheat crop in late June or early July.

Major feed mill group of South Korea has purchased around 120000 tonnes of feed wheat in two consignments of 60000 tonnes each. One consignment was bought at \$207.90/tonne C&F schedule to arrive around September 30th and other at \$208.95/tonne C&F scheduled to arrive around November 30th. Feed wheat can be sourced from Black sea region.

Outlook: Cash market is likely to trade steady to firm in the near term.
