

Wheat Domestic Fundamentals:

Wheat market is likely to trade firm in near future. No imports and good domestic demand will support prices. Furthermore, domestic availability of wheat is enough to meet emerging demand in the domestic market. As of now, prices are under pressure due to huge stock position with private traders/millers and government. Millers/traders have bought as much quantity as they could during arrival season due to higher reserve price.

All India weekly average prices decreased by 0.76 percent to Rs. 2039.37 per quintal during the week ended 08th July 2019. Wheat average price were ruling at Rs 2055.02 per quintal during 24-30 June 2019. As compared to prices in the week 01-18 July 2018, the prices are firm by 9.78 percent. Prices are expected to remain steady to slightly in coming days due to hike in import duty and good demand in domestic market.

India mainly imports from Australia and Russia. Millers prefer Australian wheat over Russian/Ukrainian wheat due to better quality. As of now, Russian wheat with 12.5 percent protein content and Australian premium wheat (APW) is being quoted at \$333.2 (Rs 22887.51) per tonne and \$402.50 (Rs 27647.73) per tonne respectively, after including freight and import duty @40%. Local expenses will further add to cost. Whereas wheat mill quality price in Chennai is ruling around Rs 22500 per tonne.

The government has purchased around 34.13 MMT of wheat until 24th June 2019. Procurement is lagging behind this year even after good production compared to last year. In RMS 2018-19, around 35.7 MMT of wheat was procured against a target of 32 MMT. Diversion of wheat to flour millers in Uttar Pradesh is one of the main reason procurement is lagging behind in RMS 2019-20. Flour millers in Uttar Pradesh are buying directly from farmers to avoid paying a higher reserve price of Rs 2080 per quintal. Apart from U.P, procurement is also slightly below target procurement in Madhya Pradesh and Rajasthan due to the same reason mentioned above.

Government has offered 15252981 tonnes of wheat in OMSS until fourth tender in June'19 out of which 91000 tonnes was sold. No rakes were sold. State government and bulk consumers bought 90500 tonnes and 500 tonnes of wheat respectively. In the month of June'19, government has sold 35900 tonnes of wheat against offered quantity of 9949900 tonnes. Government sold wheat in open market at a reserve price of Rs 2080 per quintal in the first quarter i.e. April-June. For second, third and fourth quarter prices will be Rs 2135 per quintal, Rs 2190 per quintal and Rs 2245 per quintal respectively. Millers/traders have bought as much quantity as they could during arrival season due to higher reserve price. This is the main reason for lower sale through OMSS.

As per trade sources, after increase in import duty to 40 percent imports have decreased substantially. India has imported no wheat in the month of May-19. Imports are expected to be low this year due to good domestic availability and increase in import duty. India has imported around 498.77 tonnes in the month of April-2019.

As per trade source, India has exported around 9.73 thousand tonnes in the month of May-2019. The quantity in May-2019 was exported at an average FOB of \$ 333.26 per tonne and the major destinations were Nepal, UAE and Somalia. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

Government agencies have started procurement. Until 24th June'19 government has procured around 341.15 lakh tonnes of wheat. Of the total quantity procured, around 129.12 lakh tonnes have been procured from Punjab, 93.20 lakh tonnes from Haryana, 36.87 lakh tonnes from Uttar Pradesh, 67.25 lakh tonnes from Madhya Pradesh, 0.03 lakh tonnes from Bihar, 14.02 lakh tonnes from Rajasthan, 0.42 lakh tonnes from Uttarakhand, 0.13 lakh tonnes from Chandigarh, 0.05 lakh tonnes from Gujarat and 0.01 lakh tonnes from Himachal Pradesh.

International Market Update:

Wheat CBOT increased by Cent 24.5 per bushel as USDA WASDE report reduced global production forecast for wheat. Production has been reduced due to dry conditions in Australia, Black Sea and EU. Wheat exports have been reduced for Australia, Russia and Ukraine creating opportunity for EU and US.

As per latest update, hot and dry weather is likely to continue at Australia's east coast and there is only 30 percent chance of rainfall between August 01 and October 30. Furthermore, there is 80 percent probability that entire Australia will experience warmer than average temperatures. Private analyst are expecting wheat production to be around 18.00-18.50 MMT in 2019-20. Australia has already imported 50000-60000 MT of wheat from Canada. In case of third consecutive lower production, Australia may be seen importing more wheat.

As per latest update, Egypt has purchased around 3.26 MMT of local wheat. Local wheat supply season will end on 15th July. Egypt is the largest buyer of wheat in the world. Wheat is procured to ensure food security and minimize imports as much as possible.

Outlook: Cash market is likely to trade steady to firm in the near term.
