

**Wheat Domestic Fundamentals:**

**All India weekly average prices decreased by 1.56 percent to Rs. 2019.57 per quintal during the week ended 22nd July 2019.** Wheat average price were ruling at Rs 2051.50 per quintal during 09-15 July 2019. As compared to prices in the week 16-22 July 2018, the prices are firm by 7.92 percent. Prices are expected to remain steady to firm in coming days due to hike in import duty and good demand in domestic market.

**Wheat prices are likely to remain firm in near future with small technical corrections as demand is likely to fall slightly at higher prices.** Arrivals in all major states have been declining in past weeks. Domestic availability of wheat is enough to meet emerging demand in the domestic market. Furthermore, no imports due to disparity is also providing support to prices in domestic market. Traders are advised to buy with correction. As of now, mill delivery wheat at Lawrence road is trading in the range of Rs 2100-2120 per quintal.

**As per trade sources, after increase in import duty to 40 percent imports have decreased substantially.** India has imported no wheat in the month of May-19. Imports are expected to be low this year due to good domestic availability and increase in import duty. India has imported around 498.77 tonnes in the month of April-2019.

**As per trade source, India has exported around 6.13 thousand tonnes in the month of June-2019.** The quantity in June-2019 was exported at an average FOB of \$ 375.13 per tonne and the major destinations were Nepal, UAE, Sri Lanka and Somalia. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

**As per market sources, wheat stock in central pool as on 1st July'19 stood at 458.31 lakh tonnes down by 1.57% compared to last month.** This quantity is higher by around 9.64% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

**Wheat WPI has increased from 150.7 in May-2019 to 150.8 in June-2019.** Monthly wheat inflation has increased by 0.07 percent in June-2019 compared to previous month. As compared to June-2018 wheat WPI has increased by around 5.38 percent. Wheat WPI is expected to stay steady to firm in coming month.

**India mainly imports from Australia and Russia. Millers prefer Australian wheat over Russian/Ukrainian wheat due to better quality.** As of now, Russian wheat with 12.5 percent protein content and Australian premium wheat (APW) is being quoted at \$345.8 (Rs 23746.09) per tonne and \$373.80 (Rs 25670.85) per tonne respectively, after including freight and import duty @40%. Local expenses will further add to cost. Whereas wheat mill quality price in Chennai is ruling around Rs 23000 per tonne. Therefore, as of now, there is no parity for wheat imports.

**Government agencies have started procurement. Until 24<sup>th</sup> June'19 government has procured around 341.15 lakh tonnes of wheat.** Of the total quantity procured, around 129.12 lakh tonnes have been procured from Punjab, 93.20 lakh tonnes from Haryana, 36.87 lakh tonnes from Uttar Pradesh, 67.25 lakh tonnes from Madhya Pradesh, 0.03 lakh tonnes from Bihar, 14.02 lakh tonnes from Rajasthan, 0.42 lakh tonnes from Uttarakhand, 0.13 lakh tonnes from Chandigarh, 0.05 lakh tonnes from Gujarat and 0.01 lakh tonnes from Himachal Pradesh.

**International Market Update:**

**Egypt's GASC (General Authority for Supply Commodities) has purchased 60000 tonnes of Russian wheat through tender.** The said quantity was bought at C&F \$215.54 per tonne. Egypt has purchased around 3.26 MMT of local wheat. Local wheat supply season will end on 15th July.

**As per latest update, South Korean flour mill SPC has bought 30000 tonnes of wheat of U.S. and Canadian origin.** Of the total quantity around 10000 tonnes is expected to arrive from Canada and 20000 tonnes is expected to arrive from United States. The said quantities are expected to arrive in South Korea between 01st Oct-15th Oct. The prices were not disclosed.

**As per latest update by Rosario grain exchange, Argentine farmers are expected to harvest around 21.5 MMT of wheat in 2019-20.** Wheat planting area is estimated to be around 6.87 million hectares. The acreage is highest in last eighteen years.

**As on 15th July Russia has harvested 28.8 million tonnes of wheat compared to 24.6 million tonnes a year ago for the same date.** Around 7.7 million hectares of area has been harvested with an average yield of 3.76 tonnes per hectare compared to 6.3 million hectares with an average yield of 3.88 tonnes per hectare a year ago for same date. Russian wheat with 11.5% protein content is being quoted at FoB \$ 184.00 per tonne.

**As per latest update, hot and dry weather is likely to continue at Australia's east coast and there is only 30 percent chance of rainfall between August 01 and October 30.** Furthermore, there is 80 percent probability that entire Australia will experience warmer than average temperatures. Private analyst are expecting wheat production to be around 18.00-18.50 MMT in 2019-20. Australia has already imported 50000-60000 MT of wheat from Canada. In case of third consecutive lower production, Australia may be seen importing more wheat.

**Outlook:** Cash market is likely to trade steady to firm in the near term.
