

Wheat Domestic Fundamentals:

As per latest update, roller flour mills in Punjab are facing a supply shortage even after bumper production as well as procurement in Punjab. According to Punjab Mandi Board, around 70-75 percent of wheat in the state is procured by procurement agencies. Due to luster loss this year, wheat sold by FCI is not fit for making Maida but can be used for making Aata. Therefore millers in Punjab are dependent on wheat supply from Uttar Pradesh. However that too has stopped due to better prices of wheat in Uttar Pradesh itself. Millers have met FCI official and asked for supply of wheat from August 15. FCI official have said, "We are working on it, this is not an issue which cannot be sorted out".

FSSAI has introduced +F logo on packets for Rice, Wheat, etc. This logo will help in identifying which products are nutritious. FSSAI has mandated to print +F logo on all staple food products so that all sections of the society receive appropriate nutrition. In case this instruction is not followed, the product will be termed under misbranded and legal action would be taken.

Government has offered 2197850 tonnes of wheat in OMSS until third tender in July'19 out of which 177250 tonnes was sold. No rakes were sold. State government and bulk consumers bought 176700 tonnes and 550 tonnes of wheat respectively. In the month of June'19, government has sold 35900 tonnes of wheat against offered quantity of 9949900 tonnes. Government sold wheat in open market at a reserve price of Rs 2080 per quintal in the first quarter i.e. April-June. For second, third and fourth quarter prices will be Rs 2135 per quintal, Rs 2190 per quintal and Rs 2245 per quintal respectively. Millers/traders have bought as much quantity as they could during arrival season due to higher reserve price. This is the main reason for lower sale through OMSS.

All India weekly average prices decreased by 1.56 percent to Rs. 2019.57 per quintal during the week ended 22nd July 2019. Wheat average price were ruling at Rs 2051.50 per quintal during 09-15 July 2019. As compared to prices in the week 16-22 July 2018, the prices are firm by 7.92 percent. Prices are expected to remain steady to firm in coming days due to hike in import duty and good demand in domestic market.

Wheat prices are likely to remain firm in near future with small technical corrections as demand is likely to fall slightly at higher prices. Arrivals in all major states have been declining in past weeks. Domestic availability of wheat is enough to meet emerging demand in the domestic market. Furthermore, no imports due to disparity is also providing support to prices in domestic market. Traders are advised to buy with correction. As of now, mill delivery wheat at Lawrence road is trading in the range of Rs 2100-2120 per quintal.

As per trade sources, after increase in import duty to 40 percent imports have decreased substantially. India has imported no wheat in the month of May-19. Imports are expected to be low this year due to good domestic availability and increase in import duty. India has imported around 498.77 tonnes in the month of April-2019.

As per trade source, India has exported around 6.13 thousand tonnes in the month of June-2019. The quantity in June-2019 was exported at an average FOB of \$ 375.13 per tonne and the major destinations were Nepal, UAE, Sri Lanka and Somalia. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

As per market sources, wheat stock in central pool as on 1st July'19 stood at 458.31 lakh tonnes down by 1.57% compared to last month. This quantity is higher by around 9.64% compared to last year for the same month. Government has already applied import duty on wheat to curb imports and provide support to domestic prices. Therefore, government has abundant supplies this year to tackle any unexpected rise in wheat prices by selling more quantity in open market.

International Market Update:

Bangladesh has emerged as one of the largest wheat importers in world. Bangladesh has imported 5.00 MMT of wheat in 2018-19 and is expected to import around 6.50 MMT in 2019-20. Domestic production in Bangladesh has reduced to 1.3 MMT in 2018 compared to 1.9 MMT in 1998. The main reasons for fall in production are climate change, land scarcity and disease infestation. The strong demand for wheat reflects a shift in consumer preferences towards bread as well as increasing use of wheat as a substitute for more expensive rice by Bangladesh's growing population.

China has approved wheat imports from kurgan region of Russia. This will bring Russia a step closer in remaining the leader in wheat exports. Russia is aiming to increase its export of wheat to 55.9 MMT by 2035. Russia is planning to export a total of 41.9 MMT of wheat in 2019-20.

GASC (General Authority for Supply Commodities) has purchased 300000 tonnes of Russia, Ukraine and Romanian wheat through tender. Of the total quantity 120000 tonnes was of Romanian origin, 120000 tonnes was of Ukrainian origin and 60000 tonnes was of Russian origin. Hakan purchased 60000 tonnes of Ukrainian wheat at FoB \$198.80 per tonne, Solaris purchased 60000 tonnes of Russian wheat at FoB \$202.50 per tonne, Ameropa purchased 120000 tonnes of Romanian wheat at FoB \$203.60 per tonne, Louis-Dreyfus purchased 60000 tonnes of Ukrainian wheat at FoB \$201.60 per tonne. Egypt is the largest importer of wheat and imports around 11-12 MMT of wheat every year.

Outlook: Cash market is likely to trade steady to firm in the near term.
